

Here list all possible abbreviations you have used in your research with their whole meaning. You can list them alphabetically for ease of identification—for example, SPSS: Statistical Package for Social Sciences.

Abstract

An abstract summarizes your research work from introduction, empirical reviews, methodology used, your findings, and conclusion. This section should be around 250 words having an overview of your work.

Chapter 1 - Introduction

It is the first chapter of your research work. It has several aspects. Introduce your research work, providing background information on the various aspects of your topic. Have a detailed introduction on the case to understand the background of where your research is. A well-organized introduction should offer background information from the global perspective, then continental, regional, and country or specific geographical area of interest. It shows that you have mastered your interested area of study well, from the global level to the local level where you have carried out your study.

Purpose of the study

Also referred to as the main objective of your study by some college formats, it's basically what your research work is all about.

Research Objectives

In every research, you need to have formulated the objectives that you intend to meet. Research objectives are from the independent variables in the conceptual framework you developed (see conceptual framework below). The possible variables in your conceptual framework make the basis of this section.

Research Questions

Research objectives are then used to formulate research questions you intend to answer as you meet your research goals.

Significance of the study

In this section, state why your study is important to the academic world. No research is done just for the sake of doing research. It involves resources; hence it must have some degree of significance and relevance. For instance, it can document information that has never been recorded or add knowledge to the academic world.

Limitation of your study

As a researcher, you are going into the field to collect data from various respondents via interviews or questionnaires. In a normal society, you will encounter multiple types of

Introduction to Research Methods and Report Writing Elia Shabani Mligo, 2016-04-08 This book provides introductory materials on research methods and report writing that aim at guiding students and researchers towards effective research and reporting of their findings Unlike the many volumes on research that are mostly theoretical this book originated in the classroom and grew out of the students own needs to design and conduct satisfactory research in order to meet academic requirements It is also designed to help experienced researchers in their research ventures In fulfilling this purpose the author uses simple straightforward language He also provides appropriate examples and illustrations to enable the reader to grasp the basic concepts of research The book will prove a useful guide for students and researchers in social sciences and humanities who wish to transform research theory into real and feasible research projects *Taxmann's Research Methodology - Simplifies and Enriches Research Methodologies with a Focus on Indian Context with Real-world Examples | Practical Tools | Clear and Engaging Content* Rabi N. Subudhi, Sumita Mishra, Malabika Sahoo, 2024-07-04 This textbook aims to simplify and enrich the study of research methodologies for students and doctoral scholars in management Authored by a team of seasoned educators with extensive experience teaching business research methods at various academic levels the book embodies their collective effort to demystify the complexities of management research and present them in an engaging and accessible manner What sets this textbook apart is its strong focus on the Indian context addressing the unique needs and challenges faced by students and researchers in India The authors integrate examples case studies and scenarios specific

to the Indian research environment making the book particularly relevant and helpful for Indian students and researchers. This localised focus ensures readers can easily relate theoretical concepts to real world applications within the Indian setting. The Present Publication is the Latest Edition authored by Rabi N Subudhi, Sumita Mishra and Malabika Sahoo. The pedagogical elements of the book are as follows:

- Learning Outcomes:** Each chapter begins with clearly defined learning outcomes. These outcomes provide an overview of the chapter's content and set expectations for the reader, guiding their learning journey from the outset.
- Lucid Examples:** The book includes numerous examples from real world scenarios to illustrate complex concepts. These examples help bridge the gap between theory and practice, making abstract ideas more tangible and easier to understand.
- Boxed Summarisations:** Each chapter presents key points and summaries in text boxes. These boxed summarisations offer quick and easy reference, allowing readers to review important concepts at a glance.
- Key Terms:** At the end of each chapter, key terms are highlighted and defined. These terms are also indexed at the back of the book, providing a handy reference tool for readers.
- Review Questions and Exercises:** Each chapter includes multiple choice questions reinforcing key concepts and terms. Additionally, explanatory and application based questions challenge readers to apply their knowledge in simulated business situations, fostering more profound understanding and retention.
- Demonstrations in SPSS and Excel:** Recognising the importance of data analysis in management research, the book includes demonstrations of quantitative data analysis techniques using SPSS and Microsoft Excel. These demonstrations provide practical hands on experience with the tools and methods discussed in the text.

Clear and Simple Writing: One of the book's greatest strengths is its clear and straightforward writing style. The authors have taken great care to present complex ideas straightforwardly and understandably, making the book accessible to a broad audience without compromising on depth or rigour.

The contents of the book are as follows:

- Understanding the Basics of Scientific Research in Management:** This introductory chapter lays the foundation by exploring the importance and nature of scientific research, various types of research and essential terminologies. It concludes with a summary, key terms, multiple choice questions, descriptive questions and a bibliography for further reading.
- Research Design and Process:** Analysing the steps of the research process, this chapter covers different research designs, helping readers to formulate and plan their research projects effectively.
- Review of Literature:** This chapter provides comprehensive guidance on conducting a literature review, including organising literature, identifying research gaps, understanding citation styles and addressing plagiarism concerns.
- Foundations of Quantitative Research:** This chapter introduces readers to fundamental statistical techniques such as univariate and bivariate analysis, t tests, chi square tests, correlation and regression, with practical examples and exercises.
- Measurement of Constructs:** This chapter focuses on the concepts, constructs and variables essential for measurement in research, including various scaling techniques and levels of scale measurement.
- Understanding Reliability and Validity:** This chapter discusses the critical aspects of ensuring the reliability and validity of research instruments, highlighting the importance of these concepts in producing credible research.
