 Yeh,2011-03-01 As a consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school  
 principals teachers school superintendents district staff state departments of education and governors to maximize the  
 increase in student achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on  
 extremely inefficient approaches that take enormous amounts of time both during the school day and throughout the K 12  
 learning years This is experienced in terms of the reduced time that is available to teach subjects other than math and  
 reading as schools resort to double periods of math double periods of reading and enormous amounts of remedial instruction  
 that directly reduce the time available for other subjects including science art and music In contrast this book suggests that  
 student achievement may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it  
 does not rely on unusual investments in the time required to obtain results The book draws upon a wealth of cost  
 effectiveness data to dispel common notions about what works in addressing the achievement gap increased expenditure per  
 pupil charter schools voucher programs increased educational accountability class size reduction comprehensive school  
 reform increased teacher salaries more selective teacher recruitment the use of value added methods to measure and reward  
 teacher performance the use of National Board teacher certification to identify high performing teachers and a host of other  
 approaches
