Scientists Sign Petition, Global Warming Not the Fault of Human Activity

Over 31 000 scientists from the United States have signed a petition stating they do not believe human activities have caused global warming.

The petition states that there is not enough evidence to prove that human activities have added excess “greenhouse gases” to the atmosphere that increase the overall temperature of our world. The petition also states that, even if global warming is occurring, we should let it happen, as there are benefits to having more methane and carbon dioxide in the atmosphere.

The petition, along with information about the people signing the petition, can be found at the website www.oism.org/pproject.

Adapted from www.canadafreepress.com/index.php/article/3128

2. Most scientists deny that man is responsible for global warming.
- A. The statement is refuted by the article.
B. The statement is supported by the article.
C. The statement is both supported and refuted by the article.
D. The statement is neither supported nor refuted by the article.

Bc Science 10 Blm Answer:

Silvicultural Research and the Evolution of Forest Practices in the Douglas-fir Region ,2007 Silvicultural practices in the Douglas fir region evolved through a combination of formal research observation and practical experience of forest managers and silviculturists and changing economic and social factors This process began more than a century ago and still continues It has had a great influence on the economic well being of the region and on the present characteristics of the regions forests This long history is unknown to most of the public and much of it is unfamiliar to many natural resource specialists outside and even within the field of silviculture We trace the history of how we got where we are today and the contribution of silvicultural research to the evolution of forest practices We give special attention to the large body of information developed in the first half of the past century that is becoming increasingly unfamiliar to both operational foresters andperhaps more importantlyto those engaged in forestry research We also discuss some current trends in silviculture and silviculture related research
