Small Sample Size Solutions Rens van de Schoot,Milica Miočević,2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics

The Routledge Handbook on the Influence of Built Environments on Diverse Childhoods Kate Bishop,Katina Dimoulas,2024-07-01 Children and young people are often discussed as if they are homogenous groups The reality is of course very different with an enormous variation within each of these groups and in any domain of experience pertaining to childhood or adolescence Driven by personal sociocultural

geographic or economic circumstances many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people highlighting the unique and different considerations associated with their particular circumstances in each instance and identifying the repercussions for their physical environmental needs Ultimately this book creates an evidence based discussion which can be used by designers planners and policy makers and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision

Psychosocial Aspects of Skin Conditions and Diseases Andrew Robert Thompson, Jacek Cezary Szebietowski, Antoinette I.M Van Laarhoven, Christina Schut, Sylvia Van Beugen, 2023-09-25

There is a growing recognition of the interplay between psychosocial factors and skin disease in relation to disease onset flare up adaptation and management Many skin conditions are complex systemic diseases which are influenced by psychophysiological factors and which in turn have the potential to trigger psychological distress Further it is well established that skin conditions ranging from acne and alopecia to psoriasis and vitiligo can be associated with considerable psychosocial burden stigmatisation and outright discrimination Unfortunately despite recent advances in medical treatments for a number of skin conditions evidence based psychological interventions specifically targeting distress associated with skin conditions remain in short supply
