## **Coded Ui Test:**

*Test Automation Using Microsoft Coded Ui with C#* Navneesh Garg, Vaibhav Mittal, 2016-10-01 Coded UI being an automation tool from Microsoft is gaining huge popularity. A key objective of this book is to showcase in a simple guided way how to use Microsoft Coded UI so that you can attain maximum return on investment from using the tool. Not only will you learn how to use the tool but also how to effectively create maintainable frameworks using Coded UI. As part of the scope of this book we will cover Microsoft Coded UI with C as the programming language with Visual Studio 2015. We will be using Visual Studio 2015 as the main IDE for creating Coded UI tests. No prior knowledge of C language is required for this book but having an understanding of object oriented programming language concepts will definitely help. As part of this book we will be covering Basics of C which would be required to use Microsoft Coded UI for beginner users. We will also learn how Microsoft Coded UI integrates with continuous Integration tools like Team Foundation Server. Our intent in this book is to discuss the key features of Microsoft Coded UI and cover all crucial aspects of the tool in order to help you create effective automation frameworks using Microsoft Coded UI. The target audience for this book are manual functional testers who want to learn Microsoft Coded UI quickly and who want to create effective automation frameworks that generate positive ROIs to stakeholders.

**Hand Coding Coded Ui** G. Suden, 2017-06-06 This book is aimed at testers who want to try their hands at automated testing using Coded UI which is available as part of Microsoft R Visual Studio R Enterprise Edition. Coded UI has empowered developers and automation testers to work using the same automation tool and language hence enabling them to collaborate more efficiently and effectively. Moreover Coded UI can be used for both Web and Windows based Applications which enables automation testers to devise a single Automation Framework that reuses common code and libraries. This book provides a step by step guide that will teach you how to setup the Automation Framework from scratch using Coded UI. It includes complete listings of the hand coded automation code for the demo Website Windows based applications Windows Forms and WPF Applications and Web Service that have been developed for you to test against. The code listings explain the logic of individual tests repositories and generic functions. The hand coding approach used in this book can be applied to any project which aims to use Coded UI as the test automation tool. In this book you will Learn Golden Automation Rules Understand UI Controls and their hierarchy in Coded UI Learn about Control Identification Mechanism used in Coded UI Set up the Automation Framework and Object Repository from scratch Add important features to the Automation Framework such as reporting result comparisons saving screenshots logging information to the Standard Output window CSV files generating Test Result Summary etc Automate testing of Web Applications using UITestControls and HtmlControls Perform Data Driven Testing using Microsoft Excel data sources Perform Cross Browser Testing using Firefox Chrome Internet Explorer and Microsoft Edge Automate testing of Web Services Automate testing of Windows Forms Applications using WinControls Automate testing of Windows Presentation Foundation WPF Applications using WpfControls Get robust library

of generic functions Complete with automation code for the demo Website Web Service Windows Forms Application and WPF Application Since this book has been designed to be a Practical Oriented Approach we will adhere to the following steps in each section of a chapter wherever applicable define a Test Scenario using one of the demo applications Website Windows Forms Application WPF Application or the Web Service define the required Configuration Parameters in the Configuration File write code for the required controls in the Repository File write code for the required generic functions in the Utility File write code for the business process in the Page File write code for the test logic as per the Test Scenario defined in the beginning in the Test File finally execute the test and view the Outcome
