up different materials using different methods they all chart relations between the key elements of agency intentionality causality flexibility and accountability Each chapter seeks to explain how and why such relations are distributed not just across individuals but also across bodies and minds people and things spaces and times To do this the authors work through empirical studies of particular cases while also offering reviews and syntheses of key ideas from the authors respective research traditions Our goals with this collection of essays are to assemble insights from new research on the anatomy of human agency to address divergent framings of the issues from different disciplines and to suggest directions for new debates and lines of research We hope that it will be a resource for researchers working on allied topics and for students learning about the elements of human specific modes of shared action from causality intentionality and personhood to ethics punishment and accountability      *Official Gazette of the United States Patent Office* United States.
