

Cognos Performance Tuning Tips & Tricks

Q: Should Garbage Collection be generational or balanced?

A: We recommend leaving it set to generational unless you have a specific need.

Q: Will changing/increasing the Java heap settings affect performance for non-DQM reports?

A: Not really, but a poorly tuned Java heap in Cognos can have negative effects on the overall environment.

Q: Is there any documentation for routing rules?

A: Information on routing rules can be found in [Chapter 5 of the Cognos Administration and Security Guide](#).

IBM Business Process Manager V7.5 Performance Tuning and Best Practices IBM Business Process Management Performance Team, IBM Redbooks, 2012-04-11 This IBM Redpaper™ publication provides performance tuning tips and best practices for IBM Business Process Manager BPM V7.5 all editions and IBM Business Monitor V7.5. These products represent an integrated development and runtime environment based on a key set of service oriented architecture SOA and business process management technologies. Such technologies include Service Component Architecture SCA, Service Data Object SDO, Business Process Execution Language for Web services BPEL, and Business Processing Modeling Notation BPMN. Both BPM and Business Monitor build on the core capabilities of the IBM WebSphere Application Server infrastructure. As a result, BPM solutions benefit from tuning configuration and best practices information for WebSphere Application Server and the corresponding platform Java Virtual Machines JVMs. This paper targets a wide variety of groups both within IBM development services, technical sales, and others and customers. For customers who are either considering or are in the early stages of implementing a solution incorporating BPM and Business Monitor, this document proves a useful reference. The paper is useful both in terms of best practices during application development and deployment and as a reference for setup, tuning, and configuration information. This paper introduces many of the issues influencing the performance of each product and can serve as a guide for making rational first choices in terms of configuration and performance settings. Similarly, customers who have already implemented a solution using these products might use the information presented here to gain insight into how their overall integrated solution performance might be improved. **IBM Business Process Manager**
