Claiming the Stones, Naming the Bones Elazar Barkan, Ronald Bush, 2003-01-09 These fourteen essays address controversies over a variety of cultural properties exploring them from perspectives of law archeology physical anthropology ethnobiology ethnomusicology history and cultural and literary study The book divides cultural property into three types Tangible unique property like the Parthenon marbles intangible property such as folktales music and folk remedies and communal representations which have lead groups to censor both outsiders and insiders as cultural traitors *Global Health Governance and Human Rights* Mary, Jyothis, Madaan, Akanksha, Anand, Amit, Danielsson, Alicia, 2025-12-03 Advancements in medical science and technology have the potential to transform global health but they also bring ethical challenges related to fairness accessibility and equity Intellectual property laws and governance structures while encouraging innovation can inadvertently limit access to essential treatments particularly in underserved regions Balancing the need for innovation with the imperative of equitable healthcare requires careful policy design and global cooperation Addressing these issues is vital to ensuring that medical breakthroughs benefit all populations not just those with economic or geographic advantages *Global Health Governance and Human Rights* provides a comprehensive and interdisciplinary examination of the ethical dimensions of healthcare innovation and the mechanisms that either promote or restrict access to life saving medical treatments By engaging with diverse perspectives including those from law medicine global health governance and human rights advocacy it offers practical insights into how to reconcile the competing demands for innovation and equity Covering topics such as affordable pharmaceuticals right to food and transgender persons this book is an excellent resource for academicians legal professionals policymakers healthcare practitioners and those working in global health governance

"Music after Hitler, 1945?1955 " Toby Thacker, 2017-07-05 The political control of music in the Third Reich has been analysed from several perspectives and with ever increasing sophistication However music in Germany after 1945 has not received anything like the same treatment Rather there is an assumption that two separate musical cultures emerged in East and West alongside the division of Germany into two states with differing economic and political systems There is a widely accepted view of music in West Germany as free and in the East subject to party control Toby Thacker challenges these assumptions asking how and why music was controlled in Germany under Allied Occupation from 1945 1949 and in the early years of semi sovereignty between 1949 and 1955 The re education of Germany after the Hitler years was a unique historical experiment and the place of music within this is explored here for the first time While emphasizing political economic and broader social structures that influenced the production and reception of different musical forms the book is informed by a sense of human agency and explores the role of salient individuals in the reconstruction of music in post war Germany The focus is not restricted to any one kind of music but concentrates on those

aspects of music professional and amateur live and recorded which appeared to be the mostly highly charged politically to contemporaries Particular attention is given to denazification and to the introduction of international music Thacker traces the development of a divide between Communist and liberal democratic understandings of the place of music in society The contested celebrations of the Bach Year in 1950 are used to highlight the role of music in the broader cultural confrontation between East and West Thacker examines the ways in which central governments in East and West Germany sought to control and influence music through mechanisms of censorship and positive support The book will therefore be of interest not only
