Advanced Techniques in Diagnostic Microbiology Yi-Wei Tang, Charles W. Stratton, 2018-11-09 In recent years advanced molecular techniques in diagnostic microbiology have been revolutionizing the practice of clinical microbiology in the hospital setting Molecular diagnostic testing in general and nucleic acid based amplification methods in particular have been heralded as diagnostic tools for the new millennium This third edition covers not only the most recent updates and advances but details newly invented omic techniques such as next generation sequencing It is divided into two distinct volumes with Volume 1 describing the techniques and Volume 2 addressing their applications in the field In addition both volumes focus more so on the clinical relevance of the test results generated by these techniques than previous editions **Diagnosis and Treatment of Fungal Infections** Duane R. Hospenthal, Michael G. Rinaldi, Thomas J. Walsh, 2023-09-14 Diagnosis and Treatment of Fungal Infections 3rd Edition contains the latest research and clinical evidence on fungal infections in humans Updated again by globally recognized experts this concise text is divided into sections dedicated to the patient approach laboratory and radiological diagnosis systemic antifungal agents mycoses and instructive cases It is a concise but comprehensive resource for use in conjunction with patient care duties and in teaching It is the perfect guide for hospital based primary care physicians oncologists critical care specialists and infectious disease fellows with limited training or experience in the identification and management of fungal infections **Essentials of Tissue and Cells Banking** George Galea, Marc Turner, Sharon Zahra, 2021-07-02 It has been 10 years since the first edition of Essentials of Tissue Banking has been published There is still relatively little published on the technical and scientific principles on routine tissue and cell banking based on scientific principles The 1st edition was very successful and after a 10 year gap there is a need of an update and an expansion of the book's remit The format of the book follows that of the previous edition split into 5 sections Management of donors and the banking of common tissues and cells Principles of storage and processing of tissues and cells Ensuring the safety of the products by testing the donor the tissues and the environment supported by a quality system and an IT infrastructure all working within the constraints of current regulatory and ethical environments This edition however provides a significant update Many the chapters have been completely rewritten by different experts Like the 1st edition they were given a free hand in the way they wrote their chapter with a guideline that they had to be concise clear and up to date The authors were also asked to provide the scientific and technical basis that provides the rationale of the processes they describe Also the scope of the book has been somewhat extended In view of the fact that many cellular therapies are now routinely practiced 2 new chapters have been added one on the banking of haematopoietic stem cells and one on human embryonic stem cells They have been deliberately chosen to illustrate the extreme spectrum of cellular therapies from one of the simplest to one of the most complex The intention of the book has remained the same to cover and update banking of current practices in essential tissue and cell banking It is therefore hoped that by keeping the book as concise and up to date
