Read all instructions carefully and completely before installing your new Fi2000AT module. It is recommended that a qualified mechanic or technician install this product.

1. Remove the seat and air cleaner assembly, remove both front and rear gas tank mounting bolts. Prop the rear of the gas tank up approximately 2".
2. Locate the factory connector on each fuel injector. Depress the clip on the connector and pull the connector free and move it out of the way, see Figure 1. **Note:** A pair of needle nose pliers and a long flat blade screwdriver helps with this job.
3. Lay the Powrpro module in the area underneath the seat, do not attach it to the motorcycle, route the injector wire harness forward up the right side of the frame backbone, see Figure 2. The harness can be secured using the existing zinc colored harness retainer. Place the injector harness in the plastic loom tray along the right side of the frame backbone. Route the forward set of connectors to the front injector.
4. Attach the pair of Powrpro module's injector plugs labeled "FRONT" to the front injector. Take the original H.D. connector and insert the corresponding Powrpro connector into it, refer to Figure 1.
5. Attach the Powrpro module's remaining injector plugs labeled "REAR" onto the rear injector. Then take the original H.D. connector and insert the corresponding Powrpro connector into it, refer to Figure 1.
6. It is now time to install the oxygen (O₂) sensor harnesses. Disconnect ground lead first and then positive lead from battery. Remove the battery for access to the area underneath it and to aid in harness installation. Route the longer O₂ sensor harness down through the front of the battery box opening and out the front right side, Figure 3. Continue to route it to the right rear frame next to the swing arm mount and down past the rear of the transmission, then forward along the lower right frame rail to the voltage regulator.
7. Remove the 2 Allen bolts that secure the voltage regulator bracket to the engine case. Ease the voltage regulator forward just enough to access the front O₂ connector, it is located on the backside of this bracket, see Figure 4. Unplug the connector and then plug the Powrpro female connector into the original HD male connector as well as the other mating pair of connectors. Reinstall this connection on to the voltage regulator bracket and zip tie the other mating pair to it. Be sure the O₂ sensor harness exits the right side, when securing the voltage regulator back on to the engine case. Secure the Powrpro O₂ harness to the lower right frame rail in the locations shown in Figure 5.
8. Route the shorter Powrpro O₂ sensor harness to the front side of the battery box. Locate the stock rear O₂ sensor connectors and disconnect them, see Figure 3. Mate the corresponding male and female connectors with the Powrpro O₂ connectors. Secure this harness to an existing harness along the top of the right frame member using one of the supplied zip ties.
