**Collective Actions in Europe** Csongor István Nagy, 2019-08-19 This open access book offers an analytical presentation of how Europe has created its own version of collective actions In the last three decades Europe has seen a remarkable proliferation of collective action legislation making class actions the most successful export product of the American legal scholarship While its spread has been surrounded by distrust and suspiciousness today more than half of the EU Member States have introduced collective actions for damages and from those who did more than half chose to some extent the opt out system This book demonstrates why collective actions have been felt needed from the perspective of access to justice and effectiveness of law the European debate and the deep layers of the European reaction and resistance revealing how the Copernican turn of class actions questions the fundamentals of the European thinking about market and public interest Using a transsystemic presentation of the European national models it analyzes the way collective actions were accommodated with the European regulatory environment the novel and peculiar regulatory questions they had to address and how and why they work differently on this side of the Atlantic [Research Handbook on Private Enforcement of Competition Law in the EU](#)

Barry J. Rodger, Miguel S. Ferro, Francisco Marcos, 2023-02-14 The Research Handbook on Private Enforcement of Competition Law in the EU provides wide ranging coverage of a key aspect of competition law enforcement which is undergoing constant and rapid growth in significance The Handbook examines the private enforcement of competition law across the EU and beyond shedding light on pertinent and underlying issues **Collective Bargaining Developments in Times of Crisis** Sylvaine Laulom, 2016-04-24 In many EU Member States the various economic crises of recent years provided grounds for a rarely equalled level of state intervention in the regulation of labour relations with an explicit aim the decentralisation of collective bargaining An extensive body of research summed up and analysed expertly in the chapters of this very important book reveals that the process of decentralisation has more often than not led to a situation where salaries and labour conditions are ever more frequently determined by direct negotiations between employer and employees with the State becoming the sole guarantor of employee protection even as it encourages decreasing labour costs to ensure that companies remain competitive The comparative approach offered in this book adds to this synthesis by providing examples of specific recent developments in fourteen Member States and Turkey Among the numerous topics and issues that arise are the following opt out clauses that derogate unfavourably from sectoral agreement standards extension of the employer's unilateral decision making power memoranda of understanding imposed by the troika EU ECB and IMF and stand by arrangements imposed by the IMF However notwithstanding the strong emphasis on changing the structure of collective agreements by shifting the centre of gravity closer to the company research finds promise in the reconstituted support for sector level agreements increasingly found among very small businesses networked businesses and work via digital platforms This is the first book to take stock of the current state of collective bargaining in Europe It is an essential study for labour and

employment law practitioners and an exemplary analysis of immeasurable value to policymakers and academics in the field
