Displaying the turning radius and pathway lines

- The static, red turning radius line shows the space needed to the side of the vehicle when the steering wheel is turned all the way.
- The variable, green pathway line assists you in assessing the amount of space actually needed to the side of the vehicle. The lane line depends on the engaged gear and the current steering angle. The track line is continuously adjusted for the steering wheel movement.

"Parking aid lines"

Turning circle and pathway lines are displayed.

System limits

A Check Control message is displayed when a camera is not working.

Side View

The concept

Side View provides an early look at cross traffic at blind driveways and intersections. Road users concealed by obstacles to the left and right of the vehicle can only be detected relatively late from the driver's seat. To improve the viewing, each camera, front and rear on the vehicle, detects the traffic area on the side.

Which camera is active is shown on the top edge of the screen.

Information

The images of the cameras are displayed, depending on the gear selected, on the Control Display.

WARNING

The system does not relieve from the personal responsibility to correctly assess the traffic situation. There is risk of an accident. Adjust the driving style to the traffic conditions. Watch traffic and vehicle surroundings closely and actively interfere in the respective situations. ◀
