

How to Critique Qualitative Research Articles

Cheryl Forchuk and Jacqueline Roberts

The critique of qualitative research requires the use of different standards and criteria than are used for quantitative research. The great diversity of available qualitative methods can make evaluation or critical appraisal difficult for consumers of research who are less familiar with these methods. The current paper suggests that the following guidelines be used when a qualitative research paper is being examined: the topic must be appropriate for qualitative enquiry; the specific qualitative research method chosen must "fit"; the literature reviewed should be consistent with the method chosen; there should be ample description of informants or participants, context, and researcher; appropriate methods for information gathering and information analysis should be employed; the conclusions should be sound; and, the research must have some importance and relevance.

Comment critiquer les articles de recherche qualitative: La critique de la recherche qualitative exige l'utilisation de normes et de critères différents de ceux utilisés pour la recherche quantitative. L'énorme diversité des méthodes qualitatives disponibles peut rendre l'évaluation ou la critique difficile pour des «consommateurs» de recherche qui n'ont pas l'habitude de ces méthodes. Le présent article propose que les lignes directrices suivantes soient respectées lorsqu'une recherche qualitative est examinée: le sujet doit être adapté à une étude qualitative; la méthode de recherche qualitative spécifique choisie doit convenir; la documentation étudiée doit être compatible avec la méthode choisie; la description des informateurs ou des participants, du contexte et du chercheur doit être abondante; on doit employer les méthodes adéquates pour la collecte d'information et pour son analyse; les conclusions doivent être saines et la recherche doit revêtir une certaine importance et une certaine pertinence.

Research must be read with a critical eye. Guidelines for examining quantitative research methodologies have been documented (Brown, 1991; Sackett, Haynes, & Tugwell, 1985), but similar guidelines for qualitative studies are not as numerous. This led the authors to devise a set of guidelines suitable for students in an undergraduate nursing program and to clarify some of the purposes and elements of qualitative research. Health professionals who are unfamiliar with the purposes and appropriate standards of qualitative research may also be ill-equipped to critique it. It is therefore hoped that these guidelines might also introduce them to qualitative methods.

Cheryl Forchuk, R.N., B.A., B.Sc.N., M.Sc.N., Ph.D., is a Clinical Nurse Specialist at the Hamilton Psychiatric Hospital in Hamilton, Ontario and Associate Clinical Professor at McMaster University, Hamilton, Ontario. Jacqueline Roberts, R.N., B.Sc.N., M.Sc., is Associate Professor in the School of Nursing at McMaster University in Hamilton, Ontario.

Critique Guidelines Of Qualitative Research
