Epidemic Reid Wilson,2018-03-15 A global health catastrophe narrowly averted A world unprepared for another outbreak In December 2013 a young boy in a tiny West African village contracted the deadly Ebola virus The virus spread to his relatives then to neighboring communities then across international borders The world s first urban Ebola outbreak quickly overwhelmed the global health system and threatened to kill millions As we are currently seeing in an increasingly interconnected world in which everyone is one or two flights away from New York or London or Beijing a localized epidemic

has become a pandemic Ebola's spread through West Africa to Nigeria the United Kingdom and the United States sounded global alarms that the next killer outbreak is right around the corner and that the world is woefully unprepared to combat a new deadly disease From the poorest villages of rural West Africa to the Oval Office itself this book tells the story of a deadly virus that spun wildly out of control and reveals the truth about how close the world came to a catastrophic global pandemic It is a story that serves as a cautionary tale for the COVID 19 epidemic currently spreading throughout the world

Ebola David Quammen,2014-10-03 A frightening and fascinating masterpiece of science reporting that reads like a detective story Walter Isaacson In 1976 a deadly virus emerged from the Congo forest As swiftly as it came it disappeared leaving no trace Over the four decades since Ebola has emerged sporadically each time to devastating effect It can kill up to 90 percent of its victims In between these outbreaks it is untraceable hiding deep in the jungle The search is on to find Ebola's elusive host animal And until we find it Ebola will continue to strike Acclaimed science writer and explorer David Quammen first came near the virus while he was traveling in the jungles of Gabon accompanied by local men whose village had been devastated by a recent outbreak Here he tells the story of Ebola its past present and its unknowable future Extracted from Spillover by David Quammen updated and with additional material

Ebola Virus Disease: from Epidemic to Pandemic Thomas Jerome Baker,2014-10-12 With news of the first diagnosed case of Ebola in the U S the public is on edge and trying to find fast answers about just how vulnerable they are to the deadly virus This book provides answers from the most reliable and the most authoritative sources possible The sources are from a wide variety of perspectives social cultural political economic health and medical quote U S Ambassador to the United Nations Samantha Power Ebola has no greater friend than fear The virus thrives on it We see fear in the affected countries It is fear that leads community members to stigmatize survivors of the virus or the relatives of those who have died or even the health professionals and other people aiding in the response A 24 year old survivor in Guinea told me she had lived three lives her life before Ebola her life in the hell of her infection and her life since recovering She said the stigma she has suffered since beating Ebola has made her current life the hardest The stigma had so affected her that she said she was amazed by President Obama's embrace of Nina Pham the Texas nurse who was just cured of Ebola When I went to give this young woman survivor a hug goodbye though she demurred and offered a fist bump She did not seem yet to fully trust that she was cured or to recognize that she had done nothing wrong only the virus had It is fear that has caused some of those who develop a fever or other symptoms not to come forward to seek help putting themselves and the people around them at greater risk Fear that going to seek care will make them sicker or that seeking help will alienate them from their communities We also see fear in countries like my own USA whose active

participation is critically important to bringing this outbreak under control All over the world governments and our fellow citizens are afraid that if we send doctors or nurses or soldiers or engineers or other volunteers to the affected countries we will put our own communities at risk The fear is understandable Many of our countries like those most affected are dealing with Ebola for the first time and it is a dangerous and terrifying virus We must ask ourselves twenty years from now when we look back on this historic crossroads will we want to say we left this fight to the people of the affected countries Will we want to say we did not act because we thought others would win the fight without our help Will we want to admit that fear held us back If we will not want to give these answers when we are asked in twenty years and make no mistake we will all be asked we have to do more

Crisis in the Red Zone Richard Preston, 2020-04-03 NEW YORK TIMES BESTSELLER An urgent wake up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us told through the story of the deadly 2013 2014 Ebola epidemic *Crisis in the Red Zone* reads like a thriller That the story it tells is all true makes it all more terrifying Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction* From the 1 bestselling author of *The Hot Zone* now a National Geographic original miniseries This time Ebola started with a two year old child who likely had contact with a wild creature and whose entire family quickly fell ill and died The ensuing global drama activated health professionals in North America Europe and Africa in a desperate race against time to contain the viral wildfire By the end as the virus mutated into its deadliest form and spread farther and faster than ever before 30 000 people would be infected and the dead would be spread across eight countries on three continents In this taut and suspenseful medical drama Richard Preston deeply chronicles the pandemic in which we saw for the first time the specter of Ebola jumping continents crossing the Atlantic and infecting people in America Rich in characters and conflict physical emotional and ethical *Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time Preston writes of doctors and nurses in the field putting their own lives on the line of government bureaucrats and NGO administrators moving often fitfully to try to contain the outbreak and of pharmaceutical companies racing to develop drugs to combat the virus He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster *Crisis in the Red Zone* makes clear that the outbreak of 2013 2014 is a harbinger of further more severe outbreaks and of emerging viruses heretofore unimagined in any country on any continent In our ever more interconnected world with roads and towns cut deep into the jungles of equatorial Africa viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before The more we discover about the virosphere the more we realize its deadly potential *Crisis in the Red Zone* is an exquisitely timely book a stark warning of viral outbreaks to come
