MICROSOFT ACCESS Microsoft Access is Database Management System (DBMS) is the production of Microsoft which is used to combine the relational Microsoft Access Jet Database Engine with the graphical user interface and other software development tools. Microsoft Access unlike SQL Oracle databases stores the data in its own format in accordance with the Access Jet Database Engine. Via Microsoft Access you can easily import data from Excel spreadsheets, Word documents. Microsoft Access can easily work with popular and heavy databases like Oracle and SQL DB2. You can link the data and can import the data stored in other applications and their databases. Microsoft Access can understand other formats of data including database file structures. For the analysts who face ever-increasing pool of data, Microsoft is very beneficial for them. Microsoft is a major hit with larger and wider datasets because it has no predetermined row limitations. Microsoft Access manages data effectively in the different data tables. Moreover, Microsoft Access comes with the tools that help a lot in building your own distributed applications. Today's world has more data than ever, and data is just increasing, and the demand for complex data analysis is more.
