Hedgpeth, 2015-03-05 Shifting the discourse from a focus on academic language to the more dynamic but less researched construct of academic literacies this volume addresses three key questions What constitutes academic literacy What does academic literacy development in adolescent multilingual students look like and how can this development be assessed What classroom contexts foster the

development of academic literacies in multilingual adolescents The contributing authors provide divergent definitions of academic literacies and use dissimilar theoretical and methodological approaches to study literacy development Nevertheless all chapters reflect a shared conceptual framework for examining academic literacies as situated overlapping meaning making practices This framework foregrounds students participation in valued disciplinary literacy practices Emphasized in the new college and career readiness standards the notion of disciplinary practices allows the contributing authors to bridge the language content dichotomy and take a more holistic as well as nuanced view of the demands that multilingual students face in general education classrooms The volume also explores the implications of the emphasis on academic literacy practices for classroom instruction research and policy     Assessing Math Concepts Kathy Richardson,2002 Assessing math concepts is a continuum of assessments that focus on important core concepts and related critical learning phases that must be in place for children to understand and be successful in mathematics This series is based on the premise that teachers can provide more effective instruction when they aware of the essential steps that children move through in developing an understanding of foundational mathematical ideas The assessment tools presented here provide teachers with the information they need to determine precisely what children need to learn Students progress confidently when teachers are able to provide appropriately challenging learning experiences Back cover     Assessment for Instructional Planning in Special Education Naomi Zigmond,Ada Vallecorsa,Rita Silverman,1983     **Everyday Mathematics** ,2004 This grade level specific handbook provides classroom tested techniques and ideas to make assessment and instruction more manageable productive and exciting as well as offering a more complete picture of each student s progress and instructional needs through techniques and tools from the four assessment areas ongoing product periodic and outside tests The Assessment Handbook includes suggestions for observing students keeping anecdotal records following student progress and encouraging students to reflect on and communicate both what they have learned and how they feel about mathematics
