The Handbook provides a detailed roadmap for managing beyond the financial analysis of individual transactions and counterparties. Written in a straightforward and accessible style, the authors outline how to manage a portfolio of credit exposures from origination and assessment of credit fundamentals to hedging and pricing. The Handbook is relevant for corporations, pension funds, endowments, asset managers, banks, and insurance companies alike. It covers the four essential aspects of credit risk management: Origination, Credit Risk Assessment, Portfolio Management, and Risk Transfer. It provides ample references to and examples of credit market services as a resource for those readers having credit risk responsibilities. Designed for busy professionals as well as finance risk management and MBA students, as financial transactions grow more complex, proactive management of credit portfolios is no longer optional for an institution but a matter of survival.
