

Physics 207 - Lab 2 - Vectors

Introduction

Force Tables

Force tables are used to demonstrate the addition of vectors by the method of vector addition.

Objective

The objective of this experiment is to demonstrate the addition of vectors by the method of vector addition. The experiment is designed to demonstrate the addition of vectors by the method of vector addition. The experiment is designed to demonstrate the addition of vectors by the method of vector addition.

Equipment and Materials

The equipment and materials used in this experiment are a force table, a protractor, a ruler, and a set of weights.

Procedure for Experiment

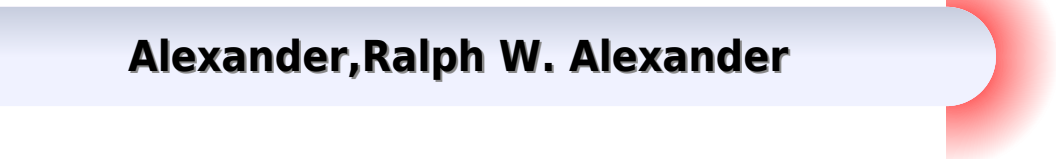

The procedure for this experiment is as follows: 1. Set up the force table with the strings and weights. 2. Measure the angles of the strings using the protractor. 3. Record the weights of the masses. 4. Calculate the resultant vector using the method of vector addition.

Results and Discussion

The results of the experiment show that the method of vector addition is valid. The calculated resultant vector is in good agreement with the experimental result. The discussion of the experiment is as follows: The experiment demonstrates the addition of vectors by the method of vector addition. The experiment is designed to demonstrate the addition of vectors by the method of vector addition.
