Abstract:

Taking abstraction as the starting point, we build a complex, *self-organizing fuzzy logic system*. Such a system, being built on top of abstraction as the base, turns out to be just a special outcome of the laws of abstraction. As the system is self-organizing, it runs automatically towards optimization. Using such a system in neural networks, we may come as close as possible to the workings of the human brain. The *abstract fuzzy optimization* is seen to follow a Gaussian distribution.

Introduction:

There are quite a large number of differences between the way present day computers work and the way the brain works. The very way in which basic processing is done by computers varies vastly from the way the brain processes information. Computers, working on binary logic, can take into account only *high* or *low* states. They can have a

An Abstract Approach to W-Structures Based on Hypersoft Set with Properties Muhammad Saeed, Atiqe Ur Rahman, Muhammad Imran Harl, 2022-03-01 Hypersoft set is an emerging knowledge of study which is projected to address the limitations of soft set for the entitlement of multi argument approximate function This function maps sub parametric tuples to power set of universe It emphasizes the partitioning of each attribute into its respective attribute valued set that is missing in existing soft set like structures

Innovative Teaching and Learning Professor Lakhmi C. Jain, 2013-11-11 Presented are innovative teaching and learning techniques for the teaching of knowledge based paradigms The main knowledge based intelligent paradigms are expert systems artificial neural networks fuzzy systems and evolutionary computing Expert systems are designed to mimic the performance of biological systems Artificial neural networks can mimic the biological information processing mechanism in a very limited sense Evolutionary computing algorithms are used for optimization applications and fuzzy logic provides a basis for representing uncertain and imprecise knowledge

How does the mind work How is data stored in the brain How does the mental world connect with the physical world The hybrid system developed in this book shows a radically new view on the brain Briefly in this model memory remains permanent by changing the homeostasis rebuilding the neuronal organelles These transformations are approximately abstracted as all or none operations Thus the computer like neural systems become plausible biological models This illustrated book shows how artificial animals with such brains learn invariant methods of behavior control from their repeated actions These robots can make decisions in any circumstances and reason by analogy whenever possible This new and expanded edition includes a prologue exploring the problems which have stopped the development of fully fledged brain models The causes of these deadlocks are listed as potential misconceptions about brain principles neural networks nervous systems robotics programming and decision logic
