### **PULL-TYPE BOW PRESS:**

This type of press pulls the riser of the bow in a vertical direction between rollers that compress the limbs.

When using this type press it is very important to position the rollers and pressure points correctly! See illustration above.

Back each limb bolt out the maximum number of turns indicated on your bow's hang tag and position the pressure points on the riser as close to the limbs as possible **WITHOUT** making contact with the limbs as shown in the photo below.
