During the First Century of Flight Barnes Warnock McCormick,Conrad F. Newberry,Eric Jumper,2004 On 17 December
1903 at Kitty Hawk NC the Wright brothers succeeded in achieving controlled flight in a heavier than air machine This feat
was accomplished by them only after meticulous experiments and a study of the work of others before them like Sir George
Cayley Otto Lilienthal and Samuel Langley The first evidence of the academic community becoming interested in human
flight is found in 1883 when Professor J J Montgomery of Santa Clara College conducted a series of glider tests Seven years
later in 1890 Octave Chanute presented a number of lectures to students of Sibley College Cornell University entitled Aerial
Navigation This book is a collection of papers solicited from U S universities or institutions with a history of programs in
Aerospace Aeronautical engineering There are 69 institutions covered in the 71 chapters This collection of papers represents
an authoritative story of the development of educational programs in the nation that were devoted to human flight Most of
these programs are still in existence but there are a few papers covering the history of programs that are no longer in
operation documented in Part I as well as the rapid expansion of educational programs relating to aeronautical engineering
that took place in the 1940s Part II is devoted to the four schools that were pioneers in establishing formal programs Part III
describes the activities of the Guggenheim Foundation that spurred much of the development of programs in aeronautical
engineering Part IV covers the 48 colleges and universities that were formally established in the mid 1930s to the present
The military institutions are grouped together in the Part V and Part VI presents the histories of those programs that evolved
from proprietary institutions Textile Technology Digest ,2001 **SME Technical Paper** Society of Manufacturing
