Bibliography for NASA Managers, 1989 **Science Fictions** Stuart Ritchie, 2020-07-21 An insider's view of science reveals why many scientific results cannot be relied upon and how the system can be reformed Science is how we understand the world Yet failures in peer review and mistakes in statistics have rendered a shocking number of scientific studies useless or worse badly misleading Such errors have distorted our knowledge in fields as wide ranging as medicine physics nutrition education genetics economics and the search for extraterrestrial life As Science Fictions makes clear the current system of research funding and publication not only fails to safeguard us from blunders but actively encourages bad science with sometimes deadly consequences Stuart Ritchie's own work challenging an infamous psychology experiment helped spark what is now widely known as the replication crisis the realization that supposed scientific truths are often just plain wrong Now he reveals the very human biases misunderstandings and deceptions that undermine the scientific endeavor from contamination in science labs to the secret vaults of failed studies that nobody gets to see from outright cheating with fake data to the more common but still ruinous temptation to exaggerate mediocre results for a shot at scientific fame Yet Science Fictions is far from a counsel of despair Rather it's a defense of the scientific method against the pressures and perverse incentives that lead scientists to bend the rules By illustrating the many ways that scientists go wrong Ritchie gives us the knowledge we need to spot dubious research and points the way to reforms that could make science trustworthy once again

Nanoweapons Louis A. Del Monte, 2017 Nanoweapons just might render humanity extinct in the near future a notion that is frightening and shocking but potentially true In Nanoweapons Louis A Del Monte describes the most deadly generation of military weapons the world has ever encountered With dimensions one thousandth the diameter of a single strand of human hair this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever In his insightful and prescient account of this risky and radical technology Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty first century He traces the emergence of nanotechnology discusses the current development of nanoweapons such as the mini nuke which weighs five pounds and carries the power of one hundred tons of TNT and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation Most critically Nanoweapons

addresses the question Will it be possible to develop deploy and use nanoweapons in warfare without rendering humanity extinct Economics Working Papers John Fletcher,1978 **Aerospace Medicine and Biology** ,1992 A selection of annotated references to unclassified reports and journal articles that were introduced into NASA scientific and technical information system and announced in Scientific and Technical Aerospace Reports STAR International Aerospace Abstracts IAA **Life Sciences : Microgravity and Space Radiation Effects** COSPAR.
