Film Theory and Contemporary Hollywood Movies Warren Buckland, 2009-06-03 Film theory no longer gets top billing or plays a starring role in film studies today as critics proclaim that theory is dead and we are living in a post theory moment While theory may be out of the limelight it remains an essential key to understanding the full complexity of cinema one that should not be so easily discounted or discarded In this volume contributors explore recent popular movies through the lens of film theory beginning with industrial economic analysis before moving into a predominately aesthetic and interpretive framework The Hollywood films discussed cover a wide range from 300 to Fifty First Dates from Brokeback Mountain to Lord of the Rings from Spider Man 3 to Fahrenheit 9 11 from Saw to Raiders of the Lost Ark and much more Individual essays consider such topics as the rules that govern new blockbuster franchises the posthumanist realism of digital cinema video game adaptations increasingly restricted stylistic norms the spatial stories of social networks like YouTube the mainstreaming of queer culture and the cognitive paradox behind enjoyable viewing of traumatic events onscreen With its cast of international film scholars *Film Theory and Contemporary Hollywood Movies* demonstrates the remarkable contributions theory can offer to film studies and moviegoers alike **Electronic Literature** N. Katherine Hayles, 2008 A visible presence for some two decades electronic literature has already produced many works that deserve the rigorous scrutiny critics have long practiced with print literature Only now however with *Electronic Literature* by N

Katherine Hayles does what we have the first systematic survey of the field and an analysis of its importance, breadth, and wide ranging implications for literary study. Hayles's book is designed to help electronic literature move into the classroom. Her systematic survey of the field addresses its major genres, the challenges it poses to traditional literary theory, and the complex and compelling issues at stake. She develops a theoretical framework for understanding how electronic literature both draws on the print tradition and requires new reading and interpretive strategies. Grounding her approach in the evolutionary dynamic between humans and technology, Hayles argues that neither the body nor the machine should be given absolute theoretical priority. Rather, she focuses on the interconnections between embodied writers and users and the intelligent machines that perform electronic texts. Through close readings of important works, Hayles demonstrates that a new mode of narration is emerging that differs significantly from previous models. Key to her argument is the observation that almost all contemporary literature has its genesis as electronic files so that print becomes a specific mode for electronic text rather than an entirely different medium. Hayles illustrates the implications of this condition with three contemporary novels that bear the mark of the digital. Included with the book is a CD, *The Electronic Literature Collection Volume 1*, containing sixty new and recent works of electronic literature with keyword index, authors' notes, and editorial headnotes. Representing multiple modalities of electronic writing: hypertext fiction, kinetic poetry, generative and combinatorial forms, network writing, codework, 3D narrative animations, installation pieces, and Flash poetry, the ELC 1 encompasses comparatively low tech work alongside heavily coded pieces. Complementing the text, the CD-ROM is a website offering resources for teachers and students, including sample syllabi, original essays, author biographies, and useful links. Together, the three elements provide an exceptional pedagogical opportunity. In *Electronic Literature*, N. Katherine Hayles has delivered a wonderfully structured, synthetic overview of writers, texts, critics, and publication venues for the field of electronic literature. In it, she has managed to articulate a non-canonical canon, a body of work and set of ideas that are flexible rather than fixed, inclusive rather than exclusive. Rita Raley, University of California, Santa Barbara. Kate Hayles has been there since the beginning. She helped formulate the field of digital literature. All readers will be charmed by her new book, high school and college literature and art teachers in particular will find this book and the CD immediately helpful to introducing students to creative writing in a new media mode. Thom Swiss, University of Minnesota. Kate Hayles stays with a text, whether electronic or otherwise, like almost no other reader or player, inhabiting each work with care and caring, transforming its material specificity to embodied sense and sensuality rather than a hollow category. In the course of defining a field, she has set it a-bloom, and in the process, refreshed our imagination. Michael Joyce, Vassar College. No critic save N. Katherine Hayles has the wide grasp of literary criticism, new media history, and technology, cyberculture, and its philosophical implications, and the interplay between electronic and print, imaginative writing. Now, in the five straightforward, readable chapters of *Electronic Literature*, she supplies the tools and builds the contexts necessary for everyone to grasp the importance of her topic and integrate it into

her or his own knowledge base Her book and CD package will be snapped up by scholars and students alike Dee Morris
