D1 Unofficial Scheme 2014:

General Psychotherapy Lotte Hartmann-Kottek, 2022-03-26 This book highlights common similarities between the various schools of psychotherapy. It provides psychotherapists with the underlying neurophysiological, developmental, psychological, and relationship-oriented matrix, basic needs, and their regulation deficits, trauma, and conflict processing patterns, including accompanying exercises as well as opportunities for healing, correction, and stabilisation, and the ways in which to apply these methods in a therapeutically mindful way for the benefit of the patient. The new university-based psychotherapy training covers the four fundamental schools of psychotherapy, i.e. the previous standard approaches plus the systemic and humanistic ones. Focusing on the common ground builds bridges of understanding and encourages collaboration. This expanded new range of methods to access patients constitutes a substantial development in the field of psychotherapy and will also influence the psychotherapy practice of experienced colleagues. Written for medical and psychological psychotherapists, psychosomatic doctors, psychiatrists, and other specialists with additional psychotherapeutic qualifications, and for students of psychotherapy.

Maternal Health Care : Policies, Technical Standards and Services Accessibility in Eight Countries in the Western Pacific Region WHO Regional Office for the Western Pacific, 2019-02-11 Target 5A of the United Nations Millennium Development Goals (MDGs) was to reduce maternal deaths by 75% between 1990 and 2015. The Maternal Mortality Estimation Inter-Agency Group, comprising the World Health Organization (WHO), the United Nations Children's Fund (UNICEF), the United Nations Population Fund (UNFPA), the World Bank Group, and the United Nations Population Division, assessed the 95 countries with an MMR higher than 100 in 1990. The report notes that Cambodia, the Lao People's Democratic Republic, and Mongolia have achieved this target in the Western Pacific Region. However, maternal mortality remains higher than the Sustainable Development Goal (SDG) target in five countries in the Region. WHO has developed evidence-based maternal health recommendations for reducing maternal mortality and morbidity. This review compares national guidelines and protocols, implementation, and health system standards to WHO recommendations for eight countries that account for 96% of maternal deaths in the Western Pacific Region.

Traditional Communities in Indonesia Lilis Mulyani, 2022-08-26 This book explores the ambiguous legal status of traditional adat communities in Indonesia and their informal traditional rights to communal ulayat land. It discusses the lack of recognition of adat communities and their legal rights in the Indonesian constitution, surveys legal consideration of informal legal rights both in Indonesia and elsewhere, and examines how thinking about these issues has evolved over time in Indonesia. It provides an in-depth study of the ways that government policies on adat communities are developed, changed, and implemented, and how different actors give meaning to these policies, particularly government bodies with authority to manage land and forests, which exercise discretion as to the operational implementation of ideas about adat groups as legal persons and ulayat land rights as land title, thus enabling their exploitation by government and business. The book highlights how these issues are becoming more pressing as problems

relating to legal personhood and rights to traditional customary land are increasingly giving rise to violent conflict dispossession and marginalisation It also demonstrates how adat communities can take action and are doing so to protect their legal positions

Planning for a Material World Laura Lieto, Robert Beauregard, 2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices
