Remote Instrumentation and Virtual Laboratories Franco Davoli, Norbert Meyer, Roberto Pugliese, Sandro Zappatore, 2010-03-10 Accessing remote instrumentation worldwide is one of the goals of e Science The task of enabling the execution of complex experiments that involve the use of distributed scientific instruments must be supported by a number of different architectural domains which inter work in a coordinated fashion to provide the necessary functionality These domains embrace the physical instruments the communication network interconnecting the distributed systems the service oriented abstractions and their middleware The Grid paradigm or more generally the Service Oriented Architecture SOA viewed as a tool for the integration of distributed resources plays a significant role not only to manage computational aspects but increasingly as an aggregator of measurement instrumentation and pervasive large scale data acquisition platforms In this context the functionality of a SOA allows managing maintaining and exploiting heterogeneous instrumentation and acquisition devices in a unified way by providing standardized interfaces and common working environments to their users but the peculiar aspects of dealing with real instruments of widely different categories may add new functional requirements to this scenario On the other hand the growing transport capacity of core and access networks allows data transfer at unprecedented speed but new challenges arise from wireless access wireless sensor networks and the traversal of heterogeneous network domains The book focuses on all aspects related to the effective exploitation of remote instrumentation and to the building complex virtual laboratories on top of real devices and infrastructures These include SOA and related middleware high speed networking in support of Grid applications wireless Grids for acquisition devices and sensor networks Quality of Service QoS provisioning for real time control measurement instrumentation and methodology as well as metrology issues in distributed systems **Let's Get IoT-fied!** Anudeep Juluru, Shriram K. Vasudevan, T.S. Muruges, 2022-09-27 Internet of Things IoT stands acclaimed as a widespread area of research and has definitely enticed the interests of almost the entire globe IoT appears to be the present as well as the future technology This book attempts to inspire readers to explore and become accustomed to IoT Presented in a lucid and eloquent way this book adopts a clear and crisp approach to impart the basics as expeditiously as possible It kicks off with the very fundamentals and then seamlessly advances in such a way that the step by step unique approach connection layout and the verified codes provided for every project can enhance the intuitive learning process and will get you onboard to the world of product building We can assure that you will be definitely raring to start developing your own IoT solutions and to get yourself completely lost in the charm of IoT Let's start connecting the unconnected It's time to get IoT fied PIC Microcontroller Projects in C Dogan Ibrahim, 2014-04-08 Extensively revised and updated to encompass the latest developments in the PIC 18FXXX series this book demonstrates how to develop a range of microcontroller applications through a project based approach After giving an introduction to programming in C using the popular mikroC Pro for PIC and MPLAB XC8 languages this book describes the
