

## BMW E46 Subwoofer System by BSW Installation Guide: ib110 for BMW 3 Series, M3 Convertible '00-'06 (E46)

### Tools Required:

- Panel Removal Tool
- 7mm and 8mm Socket/Nutdriver
- Torx Driver Set (T30 is required, but a set of Torx drivers would be ideal)
- Crimping Tool
- 10mm Socket Wrench
- Drill
- Brain

### Before you Begin

- **Please review and familiarize yourself completely with these instructions before starting work on your vehicle!**
- Insure that your bass and treble settings are set to their default middle positions before installing your subwoofer. Once you've installed your subwoofer, you can reset the bass and treble settings to taste. Keep in mind that we generally recommend keeping them both very close to center as large adjustments introduce distortion into the audio signal and will lower performance of your system.

### Amplifier Mounting Options:

You'll want to start by first deciding exactly where you want to mount your new amplifier. From there, you'll decide on appropriate paths to run your wiring. **Don't do anything permanently until you have completed the rest of the install!** This step is only so you can plan your install out first! Here are some options:

**a. Mount the amplifier to the back wall of the trunk.** We typically mount amplifiers on the back wall of the convertibles on the passenger side. You'll only be able to secure the amplifier using the passenger side mounting holes, but the pressure fitment of the amplifier won't allow it to move.
