

Endangered Animals

An endangered animal species is a species that is at risk of extinction. There are many endangered animals throughout the world.

There are several reasons that a species may become endangered. The species may experience habitat loss. Also, hunting can cause a species to become endangered. Climate and habitat change can also impact a species. The introduction of non-native species can lead to endangerment.

The United States government created laws to protect endangered species called the Endangered Species Act.

We can all help protect endangered animals. We can study a species to understand its needs and threats. Also, we can reduce waste and conserve resources to create a healthier environment for animals.

1. What is one reason that a species may become endangered?

- ☐ The species is popular.
