Welcome to the first issue of The Computer Law and Security Report. Until now access to legal and security information has not been available to the computer user and presented accordingly. It has tended to be monopolised by the legal or technical specialist. Now for the first time the situation has changed, with this Report being written exclusively with the non-expert in mind.

We recognise that as a computer user you need information about what is happening in the technological field that may affect your business. This involves not only the provision of current legal commentary but guidance on how to organise your business activities in the face of such developments. This is particularly important in the security area where there is a tremendous need for informed advice.

In The Report you will discover a complete breakdown of all that is happening in this fast-moving field and can be confident that by reading The Report nothing of importance will be missed. You might even discover answers to questions that you did not know you should be asking.
