Historical Ecology and Landscape Archaeology in Lowland South America André Carlo Colonese,Rafael Guedes Milheira,2023-06-22 This edited volume scrutinizes how pre Columbian human societies have shaped and transformed lowland South America contributing to biological and landscape diversity This geographic area has supported human populations since at least the transition from the Pleistocene to Holocene but the nature and scale of these interactions are matters of debate and their legacy to modern lowland environments is not fully understood This book brings together works from distinct disciplines including theoretical and methodological approaches on single case studies or broad regional syntheses with no chronological constraint The editors aim to generate a novel contribution reporting the most recent and ground breaking research on human interactions with past environments and resources in lowland South America from pre Columbian to Colonial times The volume also discusses the legacy of these past interactions and their potential contribution to informing current conservation and development agendas providing examples of how archaeology and paleoecology can fill gaps in conservation and developmental policy This volume will be of interest to students archaeologists and readers of Latin American studies

Phyllostomid Bats Theodore H. Fleming,Liliana M. Dávalos,Marco A.R. Mello,2020-10-16 With more than two hundred species distributed from California through Texas and across most of mainland Mexico Central and South America and islands in the Caribbean Sea the Phyllostomidae bat family American leaf nosed bats is one of the world s most diverse mammalian families From an insectivorous ancestor species living today over about 30 million years have evolved a hyper diverse range of diets from blood or small vertebrates to consuming nectar pollen and fruit Phyllostomid plant visiting species are responsible for pollinating more than five hundred species of neotropical shrubs trees vines and epiphytes many of which are economically and ecologically important and they also disperse the seeds of at least another five hundred plant species Fruit eating and seed dispersing members of this family thus play a crucial role in the regeneration of neotropical forests and the fruit eaters are among the most abundant mammals in these habitats Coauthored by leading experts in the field and synthesizing the latest advances in molecular biology and ecological methods Phyllostomid Bats is the first overview in more than forty years of the evolution of the many morphological behavioral physiological and ecological adaptations in this family Featuring abundant illustrations as well as details on the current conservation status of phyllostomid species it is both a comprehensive reference for these ecologically vital creatures and a fascinating exploration of the evolutionary process of adaptive radiation
