technology and educational reform this book is a must read for school librarians tasked with ensuring their libraries meet evolving standards This title provides the research and organizational techniques and skills they need to gain seats at the table of the three power committees technology curricula and strategic planning School librarians need to collect and publicize national and local school based evidence that shows the positive correlations between school librarians and student achievement Craver notes correlative sources and provides ideas to employ them to ensure that school librarians remain indispensable In addition acquiring technological skills and becoming expert at their application are paramount for librarians Even more important is the need for librarians to assume sole responsibility for designing and integrating information literacy and critical thinking skills throughout the curriculum Craver analyzes studies that show students inability to discern fact from fiction ads from news and information bias in electronic information sources and recommends six actions that school librarians take to ensure that they become active participants in their future rather than its victims *Assessing Learners Online* Albert Oosterhof,Rita-Marie Conrad,Donald P. Ely,2008 Online assessment and more broadly the entire online learning environment provides expanded opportunities to actively and creatively engage the learner The approach the authors have taken in this book is to work from the established fundamentals of assessment applying these principles to the online environment The authors emphasize basic issues of assessment such as establishing the evidence of validity for assessments but the context of the discussion is always that of an online environment Written by leading technology experts this clear and practical text serves as a training guide for assessing online or distance learners Readers learn how to select what should be assessed how to use written tests and projects to evaluate the skills learners have achieved how to provide feedback to learners and how to efficiently use course management software The authors believe educators involved with online training and education must have the same assessment expectations and standards as those in conventional face to face environments This book is appropriate for instructional designers and educators involved with online training and education as well as for college courses concerned with the design and delivery of distance or other forms of online instruction It also has utility as a personal reference for instructors of courses that assess students online *Tests* Taddy Maddox,2008 Contains information on testing programs and packages including hundreds of such instruments commercial and otherwise Instruments include those for psychology including such topics as attention deficit disorder families illness intelligence pain pathologies personality and wellness education including aptitude assistive technologies behavior English learning fine arts foreign language guidance academic topics and speech and language and business including skills attitudes emotional intelligence and team skills Each entry gives the intended population purpose scoring methods and cost along with a brief description of how to administer the test and use its results The editor provides indexes of test publishers test authors and titles *The Publishers Weekly* ,2005 **Evaluating Online Learning** Arthur T. Weston,2009 Education in this country has evolved dramatically from the days of one teacher in a one room schoolhouse Today student learning is no longer

confined to a physical space Computers and the Internet have broken through school walls giving students greater opportunities to personalise their education access distant resources receive extra help or more challenging assignments and engage in learning in new and unique ways This book provides a new look at the relatively new enterprise of online learning in the K 12 arena which is expanding rapidly with increasing numbers of providers offering services and more students choosing to participate As with any education program online learning initiatives must be held accountable for results Thus it is critical for students and their parents as well as administrators policymakers and funders to have data informing them about program and student outcomes and if relevant about how well a particular program compares to traditional education models Rigorous evaluations are essential to this process and are included in this book They identify whether programs and online resources are performing as promised and equally important they can point to areas for improvement
