Modelling for Implementing UNESCO Procedures Ahmad Hamed Baik,2020-06-15 The main aim of this book is to
develop and explore the value of new innovative digital content to help satisfy UNESCO s World Heritage nomination file
requirements Through a detailed exploration of two BIM case studies from Jeddah Saudi Arabia the book uniquely connects
the use of Heritage BIM to the documentation methods used by UNESCO and demonstrates how this provides a contribution
to both countries with heritage sites and UNESCO as an organisation The research and practical examples in the book seek
to address both the lack of a comprehensive method of submitting a nomination file to UNESCO and the lack of authentic
engineering information in countries where extensive heritage sites exist It looks at answering the following questions How
can Heritage Building Information Modelling HBIM be used to better maintain protect and record the updated information of
historical buildings How can HBIM provide innovation in creating the missing information for the assignment of UNESCO s
World Heritage status What additional value can a sustainable update of HBIM data provide for such sites How can HBIM
improve the cultural value of heritage buildings in the short medium and long term as well as provide a better future for
historical buildings This book will be useful reading for researchers and practitioners in the areas of heritage conservation
archaeology World Heritage nomination HBIM digital technology and engineering remote sensing laser scanning and
