Engineering and Innovation Meet Archaeology, Architecture and Art** Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2019-04-17 Tunnels and Underground Cities Engineering and Innovation meet Archaeology

Architecture and Art contains the contributions presented at the World Tunnel Congress 2019 Naples Italy 3-9 May 2019. The use of underground space is continuing to grow due to global urbanization, public demand for efficient transportation and energy saving, production and distribution. The growing need for space at ground level along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. This vision was the source of inspiration for the design of the logos of both the International ITA and Italian SIG Tunnelling Association. By placing key infrastructures underground, the black circle in the logos, it will be possible to preserve and enhance the quality of the space at ground level, the green line. In order to consider and value underground space usage together with human and social needs, engineers, architects and artists will have to learn to collaborate and develop an interdisciplinary design approach that addresses functionality, safety, aesthetics and quality of life and adaptability to future and varied functions. The 700 contributions cover a wide range of topics from more traditional subjects connected to technical challenges of design and construction of underground works with emphasis on innovation in tunneling engineering to less conventional and archetypically Italian themes such as archaeology, architecture and art. The book has the following main themes: Archaeology, Architecture and Art in underground construction, Environment, sustainability in underground construction, Geological and geotechnical knowledge and requirements for project implementation, Ground improvement in underground constructions, Innovation in underground engineering materials and equipment, Long and deep tunnels, Public communication and awareness, Risk management, contracts and financial aspects, Safety in underground construction, Strategic use of underground space for resilient cities, Urban tunnels, Tunnels and Underground Cities, Engineering and Innovation meet Archaeology, Architecture and Art. This is a valuable reference text for tunneling specialists, owners, engineers, architects and others involved in underground planning, design and building around the world and for academics who are interested in underground constructions and geotechnics. **Autodesk AutoCAD Architecture 2014 Fundamentals** Elise Moss, 2013

This fundamentals text introduces you to Autodesk's AutoCAD Architecture 2014 software. The book covers the Layer Manager, Design Center, Structural Members, Doors, Windows and Walls. Step by step lessons take the reader from creation of a site plan, floor plan and space planning all the way through to the finished building, a standard three bedroom two bathroom residence. By the end of the text you should feel comfortable enough to create a standard model and even know how to customize the interface for your own use. This text provides you with in depth coverage of toolbars, dialog boxes and commands. Educators will appreciate the quizzes and practice exam included in the text. *AutoCAD 2015 and AutoCAD LT 2015 Bible* Ellen Finkelstein, 2014-09-02. The perfect reference for all AutoCAD users.
