Annual Business Plan 2012-13

The National Construction Code (NCC) was successfully introduced in 2011 and heralded the first step in a major COAG building regulatory reform. COAG's broader plan to incorporate all onsite regulatory building requirements is being progressed further in 2012-13 with consideration of the inclusion of gasfitting into the NCC.

Life safety matters remain a priority. The 2012-13 Business Plan provides detail on the work that the ABCB is undertaking to further improve the resilience of buildings to natural disasters including bushfires, cyclones, earthquakes and flood. The ABCB also continues to respond to Ministerial direction on matters relating to adaptation to potentially adverse societal risks associated with climate change and improving energy efficiency in buildings.

This year's Business Plan elaborates on the transition of the WaterMark plumbing product certification scheme from Standards Australia to the ABCB, and its subsequent review. A comprehensive review will also be undertaken of the ABCB's building product certification scheme, CodeMark.

Details on all projects being undertaken by the ABCB during 2012-13 are outlined in the Plan.
