This text takes a project based approach to learning AutoCAD in which the student develops a campus library. Each book comes with a CD containing numerous video presentations of the written material. The first two chapters are intended to get the reader familiar with the user interface as well as the most common menus, tools, and commands that are required to work effectively with AutoCAD 2012. By the end of chapter two, the student will be excited and prepared to take on a much larger project. Throughout the rest of the book, the student develops the campus library. Using step by step tutorial lessons, the library project is followed through to create FFE plans, interior elevations, schedules, and details. In these chapters, many of the additional tools and features of AutoCAD 2012 are covered in greater detail. General building codes and industry standard conventions are covered in a way that is applicable to the current exercise.

Residential Design Using AutoCAD 2012 Daniel John Stine, 2011 Residential Design Using AutoCAD 2012 is an introductory level tutorial which uses residential design exercises as the means to teach AutoCAD 2012. After completing this book, readers will have a well rounded knowledge of Computer Aided Drafting that they can use in the industry and a feeling of satisfaction having completed a set of residential drawings. This textbook starts with an optional section that covers basic hand sketching techniques and concepts intended to increase your ability to sketch design ideas by hand and to think three dimensionally. The book then proceeds with a basic introduction to AutoCAD 2012. The first three chapters are intended to get the reader familiar with the user interface and many of the common menus and tools. Throughout the rest of the book, readers design a residence through to its completion. Using step by step tutorial lessons, the residential project is followed through to create elevations, sections, details, etc. Throughout the project, new AutoCAD commands are covered at the appropriate time. Focus is placed on the most essential parts of a command rather than an exhaustive review of every sub feature of a particular command.
