## Bendix® Wingman® Advanced™ (FLR20™ Sensor)

### ⚠ WARNING

Improper use of the Bendix® Wingman® Advanced™ system can result in a collision causing property damage, serious injuries, or death.

The driver is always responsible for the control and safe operation of the vehicle at all times. The Bendix Wingman Advanced system does not replace the need for a skilled, alert professional driver, reacting appropriately and in a timely manner, and using safe driving practices.

FIGURE 1 - BENDIX® WINGMAN® FLR20™ RADAR SENSOR AND COVER

### DESCRIPTION

The Bendix® Wingman® Advanced™ system is an integrated combination of three features:

- Adaptive cruise control with braking;
- Alerts (several different types); and
- Collision mitigation technology.

### PART ONE: ADAPTIVE CRUISE CONTROL WITH BRAKING

The adaptive cruise control with braking feature is an additional up-grade of ordinary cruise control. When using cruise control, the Wingman Advanced system will maintain the set speed, and also will intervene, as needed, to help maintain a set following distance behind a detected forward vehicle.

Using a radar sensor mounted to the front of the vehicle — with a range of approximately 500 feet — the Wingman Advanced system reacts to detected forward vehicles in the same lane, traveling in the same direction. See Figure 1.

The adaptive cruise control with braking feature is designed to help the driver maintain a set following distance between his vehicle and a detected forward vehicle when cruise control is set. See the gray "Radar Beam" area in Figure 2.

Once cruise control is set and the system is maintaining a set following distance between you and the vehicle in front:
