Roy,Roshni Thendiyath,2021-09-20 This book explores many recent techniques including ANN fuzzy logic hydraulic models and IWRM utilized for integrated water resources management a real challenge in India for obtaining high irrigation efficiency The book deals with topics of current interest such as climate change floods drought and hydrological extremes The impact of climate change on water resources is drawing worldwide attention these days for water resources many countries are already stressed and climate change along with burgeoning population rising standard of living and increasing demand are adding to the stress Further river basins are becoming less resilient to climatic vagaries Fundamental to addressing these issues is hydrological modelling which is covered in this book Further integrated water resources management is vital to ensure water and food security Integral to the management is groundwater and solute transport The book encompasses tools that will be useful to mitigate the adverse consequences of natural disasters

Recent Numerical Advances in Fluid Mechanics

Omer San,2020-07-03 In recent decades the field of computational fluid dynamics has made significant advances in enabling advanced computing architectures to understand many phenomena in biological geophysical and engineering fluid flows Almost all research areas in fluids use numerical methods at various complexities from molecular to continuum descriptions from laminar to turbulent regimes from low speed to hypersonic from stencil based computations to meshless approaches from local basis functions to global expansions as well as from first order approximation to high order with spectral accuracy Many successful efforts have been put forth in dynamic adaptation strategies e g adaptive mesh refinement and multiresolution representation approaches Furthermore with recent advances in artificial intelligence and heterogeneous computing the broader fluids community has gained the momentum to revisit and investigate such practices This Special Issue containing a collection of 13 papers brings together researchers to address recent numerical advances in fluid mechanics
