Planning, Performing, and Controlling Projects Robert Brownell Angus, Norman A. Gundersen, Thomas P. Cullinane, 2000 This text introduces the theory and practice involved in the design and management of technically oriented projects. It guides students through a four-phase systematic approach to project evolution: Concept, Study Design, and Implementation, and a real-world case study emphasizes practical aspects of the project phases. An exploration of systematic management documentation, documentation and interaction, and modeling complete this treatment and provide the balance needed for successful complex project completion. NEW Coverage of budgets, tasks, and schedules. Assists students in providing an efficient, useful, and cost-effective product, process, or service. NEW Updated technology information provides students with software references to complement text material. NEW Case study sketches give students visual descriptions related to the practical example of systematic theory. Distinct four-phase project approach. Identifies the role each portion plays in completing an entire project. Phase emphasis in four individual chapters. Includes purpose and goal activities, documentation needed, definition of completion, and exercises. Presents students with the same organizational
