

Activity: Designing an Automated Patient Register

Mathematics provided a mathematical model that your team could translate into a program. In this activity, you will use a mathematical model to build the logic for an automated patient register program. The model consists of two parts: an algorithm (what) and a data table (how).

What: What is the algorithm? How: How is the algorithm implemented?

Ch 4 And 11 Periodic Table Puzzle:

Modern Physics John Taylor, Chris D. Zafiratos, Michael A. Dubson, 2015-06-18 This book is a readable and comprehensive account of the physics that has developed over the last hundred years and led to today's ubiquitous technology. The authors lead the reader through relativity, quantum mechanics, and the most important applications of both of these fascinating theories. With more than 100 years of combined teaching experience and PhDs in particle nuclear and condensed matter physics, these three authors could hardly be better qualified to write this introduction to modern physics. They have combined their award-winning teaching skills with their experience writing best-selling textbooks to produce a readable and comprehensive account of the physics that has developed over the last hundred years and led to today's ubiquitous technology. Assuming the knowledge of a typical freshman course in classical physics, they lead the reader through relativity, quantum mechanics, and the most important applications of both of these fascinating theories. **Physical Science**

Doig, 2016-04-21 THE SHAMAN FROM OUTER SPACE is my approach to writing a scientifically plausible spaceship adventure story based on events occurring within the vicinity of nine earth-bearing solar systems in our small neighborhood among the other solar systems this side of the Milky Way. The novel follows the life of a humanoid alien pioneering his way through outer space as we learn the tale of his people and of the experiences on his journey from his planet to our own with the aid of an ancient comet mining robotic spaceship and sub-periodic table-based cryospore. Along the journey, he spends a lifetime on his home planet, another lifetime on a Plutonian outpost in his own solar system, five lifetimes on five other Earth-like planets, ending up on our planet for his last. He ultimately chooses to introduce our civilization to a global infrastructural upgrade leading us into a second renaissance. *Student Study Guide to accompany Foundations of College Chemistry, 11th Edition* Morris Hein, Susan Arena, 2003-09-03 Work more effectively and gauge your progress along the way.
