Reading Actively in Middle Grade Science Don K. Philpot, 2020-09-15 Middle grade students can learn a great deal about themselves and their world by reading informative texts in science courses. These texts will focus on important topics in earth science, life science, and physical science and shape students' understandings about scientific inquiry, science-related processes and phenomena, engineering and design, and technological innovations. But reading is a complex act, and most students need specific reading-related support to understand assigned texts in middle grade science courses. This book focuses on the cyclical nature of reading: the actions proficient readers engage in to understand science textbooks and other informational texts and the instructional support that teachers can provide to enhance middle grade students' learning of science content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail, and how do they relate to each other? What teacher-mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?

Challenge of Freedom Roger LaRaus, Harry P. Morris, Robert Sobel, 1990 Understanding Language Use in the Classroom Susan J. Behrens, 2014-05-01 It is clear that a proper understanding of what academic English is and how to use it is crucial for success in college, and yet students face multiple obstacles in acquiring this new code, not least that their professors often cannot agree amongst themselves on a definition and a set of rules. *Understanding Language Use in the Classroom* aims to bring the latest findings in linguistics research on academic English to educators from other disciplines.
