Remote Sensing of Global Croplands for Food Security Prasad Thenkabail, John G. Lyon, Hugh

Turrall, Chandrashekhar Biradar, 2009-06-24 Increases in populations have created an increasing demand for food crops while increases in demand for biofuels have created an increase in demand for fuel crops What has not increased is the amount of croplands and their productivity These and many other factors such as decreasing water resources in a changing climate have created a crisis like **Advanced Image Processing Techniques for Remotely Sensed Hyperspectral Data**

Pramod K. Varshney, Manoj K. Arora, 2013-03-09 The first of its kind this book reviews image processing tools and techniques including Independent Component Analysis Mutual Information Markov Random Field Models and Support Vector Machines The book also explores a number of experimental examples based on a variety of remote sensors The book will be useful to people involved in hyperspectral imaging research as well as by remote sensing data like geologists hydrologists environmental scientists civil engineers and computer scientists **Remote Sensing Handbook - Three Volume Set** Prasad

A volume in the three volume Remote Sensing Handbook series Land Resources Monitoring Modeling and Mapping with Remote Sensing documents the scientific and methodological advances that have taken place during the last 50 years The other two volumes in the series are Remotely Sensed Data Characterization Classification and Accuracies and Remote Sensing of Water Resources Disasters and Urban Studies In true handbook style the chapters in the volume have been carefully selected organized and designed to be self contained so that you can focus on a chapter and read it through without having to be overly dependent on other chapters This volume provides comprehensive theoretical and practical coverage of remote sensing of land resources that include vegetation and biomass agricultural croplands rangelands phenology and food security forests biodiversity ecology land use land cover carbon and soils Highlights include Global terrestrial carbon and carbon budgets Precision farming Agricultural systems studies and soil studies Global croplands agricultural croplands and rangelands Food security analysis Biodiversity Land use and land cover mapping Measuring photosynthesis from space Vegetation characterization and above ground biomass measurements and modeling Hyperspectral remote sensing Ecological studies Tropical forest characterization Habitat mapping and monitoring In a very practical way the book demonstrates the experience utility methods and models used in studying a wide array of land applications With more than 100 leading global contributors this book is the most comprehensive documentation of the scientific and methodological advances that have taken place in understanding remote sensing data methods and applications over last 50 years In a very

practical way the book demonstrates the experience utility methods and models used in studying a wide array of Land applications

Introductory Digital Image Processing John R. Jensen, 2005 For junior graduate level courses in Remote Sensing in Geography Geology Forestry and Biology This revision of Introductory Digital Image Processing A Remote Sensing Perspective continues to focus on digital image processing of aircraft and satellite derived remotely sensed data for Earth resource management applications Extensively illustrated it explains how to extract biophysical information from remote sensor data for almost all multidisciplinary land based environmental projects Part of the Prentice Hall Series Geographic Information Science

Global Perspectives on Sustainable Forest Management Dr. Clement A. Okia, 2012-04-25 This book is dedicated to global perspectives on sustainable forest management It focuses on a need to move away from purely protective management of forests to innovative approaches for multiple use and management of forest resources The book is divided into two sections the first section with thirteen chapters deals with the forest management aspects while the second section with five chapters is dedicated to forest utilization This book will fill the existing gaps in the knowledge about emerging perspectives on sustainable forest management It will be an interesting and helpful resource to managers specialists and students in the field of forestry and natural resources management

Geocology of Landscape Dynamics Seema Sahdev, R. B. Singh, Manish Kumar, 2020-03-03 This book provides an overview of the ecological indicators of landscape dynamics in the context of geographical landscape integration Landscape dynamics depicts every change that occurs in the physical biological and cognitive assets of a landscape To understand and interpret the complex physical biological and cognitive phenomena of landscapes it is necessary to operate conceptually and practically on a broad range of spatial and temporal scales Rapid land use changes have become a concern to environmentalists and planners because of their impacts on the natural ecosystem which further determines socioeconomic dynamics In this regard the book discusses case studies that share new insights into how landscape patterns and processes impact small creatures and how small creatures in turn influence landscape structure and composition In turn the relevant aspects of land use and land cover dynamics are covered and the multi faceted relationship between the substrata and ecological community is highlighted The book is unique in its focus on the application of spatial informatics such as automatic building extraction from high resolution imagery a soil resource inventory for meeting the challenges of land degradation hydrological modeling the temporal variation analysis of glacier area and the identification and mapping of glacial lakes morphometric analysis of river basins and the monitoring and modeling of urban sprawl among other features
