In order to help the American economy recover from the recession, the country urgently needs to dramatically boost its rate of small business creation. This dissertation studied Lebanese small businesses in the United States, focusing on the factors associated with their success in terms of sustainability and annual after-tax income and the perception of their contribution to society and the economy. A quantitative analysis of data gathered from 62 survey participants revealed that the success of Lebanese-owned small businesses was attributed to their human resources, operational management, management attributes, economic health, and government regulations and owners' personal traits. All these factors interacted to generate higher dollar orders and helped businesses' sustainability. In addition, this study might also help newcomers to the field seeking to develop their own business plans. Other factors pertaining to the success of Lebanese small business owners were also examined and discussed within the framework of minority and enclave theories. *Research in Constructing the Elementary School Curriculum* American Association of School Administrators, 1926 **Building & Running a Successful Research Business** Mary Ellen Bates, 2003 Online research is one of the hottest work-from-home business opportunities of the decade, and this handbook provides the information necessary to launch, manage, and build a successful research business. *Network World*, 2001-10-01 For more than 20 years, Network World has been the premier provider of information, intelligence, and insight for network and IT executives responsible for the digital nervous systems of large organizations.
