**Big Data** Kuan-Ching Li, Hai Jiang, Laurence T. Yang, Alfredo Cuzzocrea, 2015-09-15 As today's organizations are capturing exponentially larger amounts of data than ever now is the time for organizations to rethink how they digest that data. Through advanced algorithms and analytics techniques, organizations can harness this data to discover hidden patterns and use the newly acquired knowledge to achieve competitive advantages. Presenting the contributions of leading experts in their respective fields, *Big Data: Algorithms, Analytics, and Applications* bridges the gap between the vastness of Big Data and the appropriate computational methods for scientific and social discovery. It covers fundamental issues about Big Data, including efficient algorithmic methods to process data, better analytical strategies to digest data, and representative applications in diverse fields such as medicine, science, and engineering. The book is organized into five main sections: Big Data Management considers the research issues related to the management of Big Data, including indexing and scalability aspects; Big Data Processing addresses the problem of processing Big Data across a wide range of resource-intensive computational settings; Big Data Stream Techniques and Algorithms explores research issues regarding the management and mining of Big Data in streaming environments; Big Data Privacy focuses on models, techniques, and algorithms for preserving Big Data privacy; Big Data Applications illustrates practical applications of Big Data across several domains, including finance, multimedia, tools, biometrics, and satellite Big Data processing. Overall, the book reports on state-of-the-art studies and achievements in algorithms, analytics, and applications of Big Data. It provides readers with the basis for further efforts in this challenging scientific field that will play a leading role in next-generation database, data warehousing, data mining, and cloud computing research. It also explores related applications in diverse sectors, covering technologies for media, data communication, elastic media, data storage, cross-network media, data fusion, and SaaS.

Convergence has been a key topic of discussion about the future of cyberinfrastructure for science and engineering research. Convergence refers both to the combined use of simulation and data-centric techniques in science and engineering research and the possibilities for a single type of cyberinfrastructure to support both techniques. The National Academies of Science, Engineering, and Medicine convened a Workshop on Converging Simulation and Data-Driven Science on May 10, 2018, in Washington, D.C. The workshop featured speakers from universities, national laboratories, technology companies, and federal

agencies who addressed the potential benefits and limitations of convergence as they relate to scientific needs technological capabilities funding structures and system design requirements This publication summarizes the presentations and discussions from the workshop Advances in AI for Biomedical Instrumentation, Electronics and Computing Vibhav Sachan, Shahid Malik, Ruchita Gautam, Parvin Kumar, 2024-06-13 This book contains the proceedings of 5th International Conference on Advances in AI for Biomedical Instrumentation Electronics and Computing ICABEC 2023 which provided an international forum for the exchange of ideas among researchers students academicians and practitioners It presents original research papers on subjects of AI Biomedical Communications Computing Systems Some interesting topics it covers are enhancing air quality prediction using machine learning optimization of leakage power consumption using hybrid techniques multi robot path planning in complex industrial dynamic environment enhancing prediction accuracy of earthquake using machine learning algorithms and advanced machine learning models for accurate cancer diagnostics Containing work presented by a diverse range of researchers this book will be of interest to students and researchers in the fields of Electronics and Communication Engineering Computer Science Engineering Information Technology Electrical Engineering Electronics and Instrumentation Engineering Computer applications and all interdisciplinary streams of Engineering Sciences The Fusion of Internet of Things, Artificial Intelligence, and Cloud Computing in Health Care Patrick Siarry, M.A. Jabbar, Rajanikanth Aluvalu, Ajith Abraham, Ana Madureira, 2021-08-11 This book reviews the convergence technologies like cloud computing artificial intelligence AI and Internet of Things IoT in healthcare and how they can help all stakeholders in the healthcare sector The book is a proficient guide on the relationship between AI IoT and healthcare and gives examples into how IoT is changing all aspects of the healthcare industry Topics include remote patient monitoring the telemedicine ecosystem pattern imaging analytics using AI disease identification and diagnosis using AI robotic surgery prediction of epidemic outbreaks and more The contributors include applications and case studies across all areas of computational intelligence in healthcare data The authors also include workflow in IoT enabled healthcare technologies and explore privacy and security issues in healthcare based IoT Invent and Wander, 2020-11-17 In Jeff Bezos's own words the core principles and philosophy that have guided him in creating building and leading Amazon and Blue Origin In this collection of Jeff Bezos's writings his unique and strikingly original annual shareholder letters plus numerous speeches and interviews that provide insight into his background his work and the evolution of his ideas you'll gain an insider's view of the why and how of his success Spanning a range of topics across business and public policy from innovation and customer obsession to climate change and outer space this book provides a rare glimpse into how Bezos thinks about the world and where the future might take us Written in a direct down to earth style Invent and Wander offers readers a master class in business values strategy and execution The importance of a Day 1 mindset Why it's all about the long term What it really means to be customer obsessed How to start new businesses and create significant organic growth in an already successful

2022 and beyond      **Global Innovation, Finance, and International Commerce** F. John Mathis, Raja M.

Almarzoqi, 2022-12-12 This book analyses the historical context and progression of significant innovations beginning with the industrial revolution starting around 1750 to the present. It explores the interrelationship causes and evolutionary process of contemporary disruptive inventions and the role played by global finance and international commerce to support these. First, the authors examine the environment and circumstances surrounding the inventors and explore their backgrounds to determine why at a specific time they identified a need that became the seed for invention and what was their method of successfully commercializing their innovation. Secondly, they focus on the financing of the inventor, the innovation, and the commercialization of the invention. They analyze the changes in finance during the shift from a labor-based production process to a more capital-intensive production process and what new financial products or financial markets were created to facilitate this transition. Third, they explore the impact of global commerce on the inventor country's innovation environment and international competition, impacting the innovation's production, distribution, and sales, as well as investigating any financial impact from the demand side and whether that impact was domestic or global in character. Furthermore, they consider if and how global finance and international commerce, including the migration of people, together play a role in helping the disruptive invention satisfy a need in society, whether from a production or consumption perspective. Finally, they search for common elements that repeatedly inspired inventors and their disruptive innovations over time. This book will appeal to global government officials, business leadership, early career professionals, and students across a number of disciplines including finance, economics, business, engineering, and technology.
