Putting God on the Map Erin Kidd, Jakob Karl Rinderknecht, 2018-09-15 Since the middle of the last century the emergence and development of fields as diverse as artificial intelligence evolutionary science cognitive linguistics and neuroscience have led to a greater understanding of the ways in which humans think One of the major discoveries involves what researchers refer to as conceptual mapping According to theories of conceptual mapping human thought is profoundly shaped by the ability to make connections Simply put human thinking is metaphorical all the way down This insight has revolutionized the way in which scientists and philosophers think about the mind body problem the formation and function of language and even the development of scientific progress itself Until recently however this research has gone largely unnoticed within Christian theology But this revolution in understanding human cognition calls for broader and richer engagement with theology and religious studies How does this new insight into human meaning making bear on our understanding of religious meaning making And how might Christian theology interpret and respond to this new understanding of the development of human thought This edited volume offers an introduction to conceptual mapping that is accessible to those with no previous knowledge of the field and demonstrates the substantial resources this interdisciplinary research has for thinking about a variety of theological questions The book begins with a chapter introducing the reader to the basics of conceptual mapping The remaining chapters apply these insights to a variety of theological topics including anthropology sacramental theology biblical studies ecumenical theology and ethics Revisiting Modality Vitor Míguez, 2024-04-15 This book presents the first in depth investigation of modality in Galician linguistics offering a theoretical discussion of modal categories and a fine grained description of epistemic adverbs The first half of the monograph deconstructs the most relevant approaches to modal categories and shows how the traditional concept of modality is a problematic notion how it relates to other concepts such as evidentiality and mitigation and how it ought to be conceived of in order to become a more useful instrument for linguistic analysis A new way of understanding modality is explored and illustrated through Galician examples The second half of the book zooms in on six epistemic adverbs which are exhaustively studied from both a formal and a functional perspective Combining a quantitative and a qualitative perspective the book shows that adverbs make up a rich semantic scale and establishes several factors that condition their occurrence in discourse challenging previous conceptions of this grammatical domain *Museums and the Web ...* ,2004 **Technical Reports of the Knowledge Growth in a Profession Project** ,1985 Includes 1 case studies of teachers during their first year of teacher preparation and in some cases their first year of teaching and focus on issues related to the role of subject matter knowledge in teaching 2 cross case analyses 3 theoretical papers and 4 methodological papers *Introduction to Physical Anthropology* Andrew Kramer, 2002-08 Each chapter of the study guide features learning objectives chapter outlines key terms extended applications Internet activities and practice tests consisting of 25 40 multiple choice questions and 5 10 true false questions
