

American Concrete Pumping Association **TOP SAFETY CONCERNS**

Hose Whipping Hazard

When first starting, after moving the pump, or whenever air may have entered the line, keep everybody a reasonable and prudent distance away from the discharge hose until concrete is flowing smoothly.

Power Line Hazard

Maintain at least a 20-foot distance from power lines (30 feet above 350kV).

Tipping Hazard

Outriggers must be completely extended and the unit jacked to within 1° of level, as described in the operation manual.

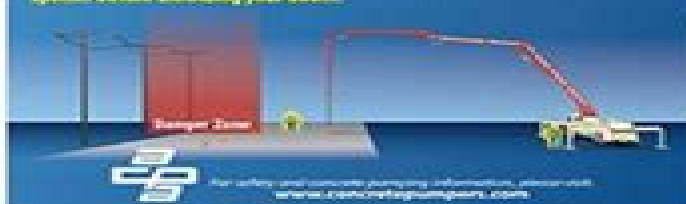

Driving Hazard

Rear-end collisions are the most common traffic accidents with concrete pumps. It takes a lot longer to stop a pump than a car. Remain alert and allow extra distance between you and the vehicle you're following.

Get a Spotter

Whenever power lines are in the area to be poured, insist on a dedicated spotter before extending your boom.

Texting / Mobile Device Warning

Never text or talk on your phone while driving or operating the concrete pump.
