

USING THE  
**Bell & Howell**  
8mm **FILMOVARA**  
PROJECTION LENS

Your new FILMOVARA projection lens lets you project your movies easier than ever before. Now, you simply adjust the lens to get the screen size you want, you don't have to move the projector or the screen. For example, you can project a big picture 40-inches wide—at any distance from 11-feet to 15-feet as shown by the simple steps and diagram below:

**1** Merely revolve the front (Black) knurled collar of the lens (1), until your picture fills the width of your screen. Revolving the lens collar inward increases picture size. Revolving it outward decreases it.

**2** If your picture is out of focus, simply rotate the Focusing Knob (2), until your picture is sharp.
