

Section A: Short Questions

Answers

- a. Nominal wage would be defined as the amount of money a person receives from work without factoring in the effects of inflation whereas real wage is the wage received when inflation is factored in.
- b. The HR department of a specific firm determines the nominal wage. It takes into account the salary in which competing firms are paying their employees and the unemployment rate of the economy before determining a suitable wage. For the real wage, the marketing department will then set the price of their product according to its demand. This price will then indicate how much of that product they can purchase with their nominal wage, this is known as the real wage.
- c. A decrease in nominal wage does imply a decrease in real wage because when there is a decrease in the wage that a worker gets to take home will lead to them having a lesser purchasing power than before.
- d. Frictional unemployment refers to when individuals are between jobs and are most likely to find a job quickly. Cyclical unemployment occurs due to changes in an economy whereby goods and services that were in demand in a certain period become out of demand and leave those people providing said goods/services out of work. Structural unemployment is a result of a mismatch between the skills offered by the workforce and the skills required by firms in the labour market. The most problematic in South Africa would be structural unemployment as there are lots of individuals who have degrees and skills that are not required by the economy.
- e. The strict definition of unemployment would only include those actively looking for work, whereas the broad definition would include those not actively looking for employment. The most quoted type of definition in media would be the broad definition.
- f. 30 individuals
- g. 170 individuals
- h. Strict definition = $30/170 = 17.64\%$ Broad definition = $60/200 = 30\%$

Salvation Manual Nsikan E. Johnny, 2024-07-25 Salvation Manual Bible Made Easy through Questions and Answers for the book of Genesis is one of several books in the Salvation Manual Bible Made Easy through Questions and Answers series Like other books in the series it adopts a questions and answers pattern in identifying and breaking down biblical truths in a way that will be easily understood and internalised In a spectacular method of using questions and answers it unravels every message event and character from all the chapters in the book of Genesis The book consists of fifty chapters one for each chapter of the book of Genesis The questions and answers are placed at the end of each chapter to assess the degree to which the reader understands the chapter read as well as how much of the details of the chapter they retained The book makes the reader study every chapter of the book of Genesis in two directions the forward and reverse directions The chapter of the book of Genesis at the beginning of each chapter of this book is the first point of contact for the reader which they have to read and understand what is contained in the chapter After that are questions from the chapter and answers at the end of the questions with which the reader would test their knowledge of what they had read in that chapter These questions and answers segment presents the reader with problems which points them back to the Bible for confirmation or further studies the forward and reverse directions The approach to Bible studies presented in this book is remarkable as it will take its reader a step above regular Bible reading to be fully grounded in the details of the events and messages in the scriptures The book is a tool that can challenge one s knowledge of the scripture serve as a Bible study guide and reveal vital information that might have been overlooked or missed in the course of one s study of the scriptures

prescription for creating change providing a compelling critique of accepted approaches to change management highlighting the strengths of these approaches and emphasizing what can be extracted to foster change Each author provides insights into the competencies skills and values required for the rapid and successful creation of lasting change In doing so they also reemphasize that there is no universal approach to change management and that the need for innovation flexibility and adaptability remains dominant
