Pecht,2008-09-11 The first book on Prognostics and Health Management of Electronics Recently the field of prognostics for electronic products has received increased attention due to the potential to provide early warning of system failures forecast maintenance as needed and reduce life cycle costs In response to the subject's growing interest among industry government and academic professionals this book provides a road map to the current challenges and opportunities for research and development in Prognostics and Health Management PHM The book begins with a review of PHM and the techniques being developed to enable a prognostics

approach for electronic products and systems building on this foundation the book then presents the state of the art in sensor systems for in situ health and usage monitoring Next it discusses the various models and algorithms that can be utilized in PHM Finally it concludes with a discussion of the opportunities in future research Readers can use the information in this book to Detect and isolate faults Reduce the occurrence of No Fault Found NFF Provide advanced warning of system failures Enable condition based predictive maintenance Obtain knowledge of load history for future design qualification and root cause analysis Increase system availability through an extension of maintenance cycles and or timely repair actions Subtract life cycle costs of equipment from reduction in inspection costs down time and inventory Prognostics and Health Management of Electronics is an indispensable reference for electrical engineers in manufacturing systems maintenance and management as well as design engineers in all areas of electronics Official Gazette of the United States Patent and Trademark Office ,1988 **Evaluation of Fault Reporting/Fault Isolation for F-15 Aircraft** C. A. Mussari,AIR COMMAND AND STAFF COLL MAXWELL AFB AL.,1985 The author set out to see if the accuracy of the FR FI manuals is a factor in their non use Accuracy of the manuals was determined by analyzing actual reported inflight discrepancies Fault code accuracy was obtained by comparing each discrepancy as written on the TAC Form 122 Debriefing Record with the discrepancy depicted in the FR manual Accuracy of repair actions was obtained by tracking the repair action recommended by the fault isolation manual and comparing it with that shown on the TAC Form 122 Analysis revealed the F 15 fault reporting manual can accurately represent a random inflight malfunction 83 8% of the time and these malfunctions can be accurately isolated in the fault isolation manual 77 7% of the time These accuracy levels are acceptable and not a major factor in the non use of the manuals Observation of the debriefing and maintenance process and interviews with aircrews and maintenance technicians revealed a general lack of understanding and confidence in the FR FI system This lack of understanding and confidence exhibited by both aircrews and maintenance personnel is the primary reason for the system s non use Recommended actions to show the effectiveness of using the system as designed are provided **Aviation Week & Space Technology** ,2006 The Pilot-Vehicle Interface.
