EXPLAINING CRIME AND DEVIANCE:
THEORETICAL PERSPECTIVES

5. Classical criminology's basic tenets are (1) crime is a rational choice; (2) if criminal solutions entail less work for greater payoff than legal ones, they are seen as more attractive; (3) fear of punishment can control people's choices; (4) society can better control criminal behaviour if it is met with measured severity, certainty of punishment, and swiftness of justice. Historically, biological approaches posited that some individuals were born to crime as a result of congenital factors, including body type; today, biosocial theorists are evaluating the association between hormonal levels and violent behaviour, among other areas.
6. Functionalists hold that the structure of society can produce social pressures that result in criminal behaviour. Two theories are discussed: strain theory and illegitimate opportunity theory. Strain theory states that people commit crime when they are unable to achieve culturally defined goals through culturally acceptable means. Illegitimate opportunity theory states that people commit crimes as a result of their particular deviant learning environment.
7. Conflict theorists view crime as the outcome of class struggle and focus on how power relationships shape criminal law.
8. Symbolic interactionists assert that criminal behaviour arises from shared experiences and perceptions. Differential association theory asserts that the ratio of messages for and against criminal behaviour in one's peer group determines whether one will engage in criminal activity. Labelling theory asserts that once people have been labelled as deviant they are likely to act that way.
9. Feminist theorists are concerned with issues of power and view patriarchy as the underlying condition behind certain crimes.

module 5.3

CRIME: TYPES AND TRENDS

10. Sociologists have identified a variety of different types of crimes. These definitions give us insight into what constitutes crimes, and why and how people commit crimes.
11. Street crime is crime that we would expect to encounter on the street, but we can encounter it anywhere. This type of crime includes violent crime, property crime, and moral crime.
12. White collar crime involves illegal activities committed by an individual during or in relation to his or her employment. Corporate crime is a form of white collar crime, but is a crime committed for the benefit of the company.
13. Professional crime occurs by people who earn their livelihood through crime. Professional criminals may work for organized crime—an operation involved in the illegal trade of goods and services.
14. Crime statistics do not necessarily reflect actual crime rates. A variety of factors—from data collection practices to shifts in demographics and public policy—can affect the data.
15. The police perform many roles, including crime control, responding to emergencies, assisting victims, maintaining peace and order, providing assistance in the prosecution of offenders, and providing education and outreach to the community.
16. The courts decide on the guilt or innocence of the accused. They also protect the rights of the accused and monitor the work of the police and the prosecution.
17. Punishment serves four purposes: retribution, deterrence, rehabilitation, and incapacitation.
