Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Trusting Teachers with School Success Kim Farris-Berg, Edward J. Dirks, Amy Junge, 2013 Lately our nation's strategy for improving our schools is mostly limited to getting tough with teachers Blaming teachers for poor outcomes we spend almost all of our energy trying to control teachers' behavior and school operations But what if all of this is exactly the opposite of what is needed What if teachers are the answer and not the problem What if trusting teachers and not controlling them is the key to school success Examining the experiences of teachers who are already trusted to call the shots this book answers What would teachers do if they had the autonomy not just to make classroom decisions but to collectively with their colleagues make the decisions influencing whole school success Decisions such as school curriculum how to allocate the school budget and whom to hire Teachers with decision making authority create the schools that many of us profess to want They individualize learning Their students are active not passive learners who gain academic and life skills The teachers create school cultures that are the same as those in high performing organizations They accept accountability and innovate and make efficient use of resources These promising results suggest it's time to trust teachers

Introduction to the Foundations of Applied Mathematics Mark H. Holmes, 2009-07-01 FOAM This acronym has been used for over fifty years at Rensselaer to designate an upper division course entitled Foundations of Applied Mathematics This course was started by George Handelman in 1956 when he came to Rensselaer from the Carnegie Institute of Technology His objective was to closely integrate mathematical and physical reasoning and in the process enable students to obtain a qualitative understanding of the world we live in FOAM was soon taken over by a young faculty member Lee

Segel About this time a similar course Introduction to Applied Mathematics was introduced by Chia Ch iao Lin at the Massachusetts Institute of Technology Together Lin and Segel with help from Handelsman produced one of the landmark textbooks in applied mathematics Mathematics Applied to deterministic Problems in the Natural Sciences This was originally published in 1974 and republished in 1988 by the Society for Industrial and Applied Mathematics in their Classics Series This textbook comes from the author teaching FOAM over the last few years In this sense it is an updated version of the Lin and Segel textbook

The New Accountability Martin Carnoy, Richard Elmore, Leslie Siskin, 2003-12-16 Standard based accountability has become a consistent buzzword emanating from the mouths of hopeful politicians liberal and conservative for almost twenty years But does accountability work The New Accountability explores the current wave of assessment based school accountability reforms which combine two traditions in American education public accountability and student testing
