Changing The Game Human Security As Grand Strategy:

Changing the Game U.s. Army War College Press,2014-12-27 Dire forecasts of game changing political social and environmental upheaval over the next thirty years only add to the pessimism generated by constraining fiscal environments and tangible signs the world over of a rising China These same pressures lend urgency to initiatives that seek greater organizational efficiency in the Department of Defense DOD and the Department of State DOS Efficient organizations alone will not suffice Only the development of cross cutting synergies between them can serve and preserve American preeminence and power in a vastly changing world Such a task requires a game changing approach Adopting the human security paradigm as grand strategy can inclusively and powerfully integrate United States Government USG functions for international development and building partner capacity In the process the versatile human security concept will generate stable foundations for security governance and rule of law abroad while preserving and even increasing American leadership around the globe Utilizing elements of the Army design methodology and creativity theory this book explores how human security can revolutionize DOD and DOS coordination and more importantly action Changing the Game John C. Anderson,Army War College (U.S.),2014-06-30 This paper argues that the foundational work already accomplished toward better military civilian coordination over the past ten years of stability operations must continue Progress already achieved can serve as valuable input to full DoS and DoD synchronization operationalized through establishment of a human security framework The first section offers an explanation of human security with a particular focus on its freedom from want and freedom from fear aspects Additionally a brief review of the literature will reveal the concept shares both proponents who cast it as a potentially powerful concept for development as well as detractors who claim that the concept s vagueness expansiveness and even vulnerability to political manipulation render its utility minimal The third section employs operational design methodology utilizing the ZIF Peace Operations 2025 report and the National Intelligence Council s Alternative Worlds Global Trends 2030 The fourth section proposes a human security framework for all United States interaction abroad employing creativity and organizational theory in support of the argument The final section predicts the beneficial grand strategy effect of a human security framework on both national security and power and offers a set of recommendations for further research and suggestions for gradual implementation **Strategic Choices for a Turbulent World** Andrew R. Hoehn,Richard H. Solomon,Sonni Efron,Frank Camm,Anita Chandra,Debra Knopman,Burgess Laird,Robert J. Lempert,Howard J. Shatz,Casimir Yost,2017-01-18 This report is the last of a six volume series in which RAND explores the elements of a national strategy for the conduct of U S foreign policy It analyzes U S strengths and weaknesses and suggests adaptations for this new era of turbulence and uncertainty The report offers three alternative strategic concepts and evaluates their underlying assumptions costs risks and constraints Routledge Companion to Peace and Conflict Studies Sean Byrne,Thomas Matyók,Imani Michelle Scott,Jessica Senehi,2019-07-24 This Companion examines contemporary

challenges in Peace and Conflict Studies PACS and offers practical solutions to these problems Bringing together chapters from new and established global scholars the volume explores and critiques the foundations of Peace and Conflict Studies in an effort to advance the discipline in light of contemporary local and global actors The book examines the following eight specific components of Peace and Conflict Studies Peace and conflict studies praxis Structure agency tension as it relates to social justice nonviolence and relationship building Gender masculinity and sexuality The role of partnerships and allies in racial ethnic and religious peacebuilding Culture and identity Critical and emancipatory peacebuilding International conflict transformation and peacebuilding Global responses to conflict It argues that new critical and emancipatory peacebuilding and conflict transformation strategies are needed to address the complex cultural economic political and social conflicts of the 21st century This book will be of much interest to students of peace and conflict studies peace studies conflict resolution transitional justice reconciliation studies social justice studies and international relations

Emerging Technologies and International Security Reuben Steff, Joe Burton, Simona R. Soare, 2020-11-25 This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis While recent technological developments such as Artificial Intelligence AI robotics and automation have the potential to transform international relations in positive ways they also pose challenges to peace and security and raise new ethical legal and political questions about the use of power and the role of humans in war and conflict This book makes a contribution to these debates by considering emerging technologies across three levels of analysis 1 the international system systemic level including the balance of power 2 the state and its role in international affairs and how these technologies are redefining and challenging the state's traditional roles and 3 the relationship between the state and society including how these technologies affect individuals and non state actors This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space The chapters examine the implications of these technologies for the balance of power examining the strategies of the US Russia and China to harness AI robotics and automation and how their militaries and private corporations are responding how smaller and less powerful states and non state actors are adjusting the political ethical and legal implications of AI and automation what these technologies mean for how war and power is understood and utilized in the 21st century and how these technologies diffuse power away from the state to society individuals and non state actors This volume will be of much interest to students of international security science and technology studies law philosophy and international relations

The Costs of War Richard Falk, 2012-08-21 In The Costs of War Richard Falk brings together some of his recent essays published and unpublished examining the impact that the Iraq War has had and will have on international law human rights and democracy A new introduction provides an overview as well as a sense of the current context and reflects on the internal prospects for Iraq and on the logic of an early US military and political withdrawal

Having been revised and updated to take account of the march of events the essays are organized into the following sections Part 1 addresses the effects of the American invasion and occupation of Iraq on the current dimensions of world order Part 2 provides a normative inquiry into the larger intentions and consequences of the Iraq War Part 3 considers the more fundamental implications of the Iraq War especially on our understanding of war as an instrument for the solution of conflict Falk demonstrates the dysfunctionality of war in relation to either anti terrorism or the pursuit of a global security system based on military dominance the historical potential of a realistic Gandhism as a positive alternative in the setting of global policy in the twenty first century The Costs of War will be of interest to students and scholars of political science media studies and politics and international relations in general Turbulent Peace Chester A. Crocker,Fen Osler Hampson,Pamela R. Aall,2001 This text explores the sources of contemporary conflict and the many possible responses to it The authors 50 analysts of international affairs present multiple perspectives on how best to prevent manage or resolve conflicts around the world **Strategy in the Contemporary World** John Baylis,James J. Wirtz,Jeannie L. Johnson,2022 This authoritative survey of strategic studies gives students a complete introduction to strategic thinking from historical and theoretical approaches to the contemporary issues and challenges facing the world today A team of expert authors present readers with key debates and a range of perspectives encouraging critical thinking **Xinjiang and China's Rise in Central Asia - A History** Michael E. Clarke,2011-03-08 The recent conflict between indigenous Uyghurs and Han Chinese demonstrates that Xinjiang is a major trouble spot for China with Uyghur demands for increased autonomy and where Beijing's policy is to more firmly integrate the province within China This book provides an account of how China's evolving integrationist policies in Xinjiang have influenced its foreign policy in Central Asia since the establishment of the People's Republic in 1949 and how the policy of integration is related to China's concern for security and its pursuit of increased power and influence in Central Asia The book traces the development of Xinjiang from the collapse of the Qing empire in the early twentieth century to the present and argues that there is a largely complementary relationship between China's Xinjiang Central Asia and grand strategy derived interests This pattern of interests informs and shapes China's diplomacy in Central Asia and its approach to the governance of Xinjiang Michael E Clarke shows how China's concerns and policies although pursued with vigour in recent decades are of long standing and how domestic problems and policies in Xinjiang have for a long time been closely bound up with wider international relations issues **Interpreting China's Grand Strategy** Michael D. Swaine,Ashley J. Tellis,2000 Examines China's grand strategy for national security in the past present and future **Strategy and Force Planning** ,2000 **Naval War College Review** Naval War College (U.S.),1995 **Naval War College Review** ,1995 Russia Roger E. Kanet,2007-06-28 This book is a comprehensive study of Russian foreign policy and the commitment to re-establishing Russia as a great power **Bio-inspired Innovation and National Security** National Defense University. Center for Technology and National Security Policy,2010 From the Introduction This

volume is designed as an overview of the many applications of biology to the military and national security writ large with the exception of bioweapons and biomedicine Policy issues are covered and original research is presented The diversity of the authors backgrounds reflects the breadth of applications and opportunities of biology to modern problems The read should walk away enlightened as to the many possible ways in which biology is influencing and will continue to influence national security Authors were asked to provide foresight on trends and indicators in their areas of interest but not forecasts which would describe a single future state in order to better understand their implications for the next 20 years or so

Documentation politique internationale ,2003 **Theoretical Inquiries in Law** ,2006 Reform in the Middle East Oil Monarchies Anoushiravan Ehteshami,Steven M. Wright,2008 The oil rich monarchies of the Arabian Peninsula are frequently dismissed as having no democratic systems compared to most other regions of the world Indeed the United States justified its action in Iraq by proclaiming that democracy and freedom must be adopted both in Iraq and throughout the wider Middle East in order to counter the conditions which breed international terrorism It has been argued that the countries of the Arabian Peninsula need to provide a system of democratic representation that fully takes into account their own history and culture This raises many questions Can their firmly established tradition of rule provide the basis for the evolution of an Arab form of constitutional monarchy Should the West be seeking to encourage national indigenous evolution rather than working to impose Western systems What are the risks of change and what has been achieved so far This book addresses these issues and examines the drivers progress and challenges for future change in this vitally strategic area of the world **Free World Security and the South Atlantic** ,1979 **Comprehensive Dissertation Index** ,1984
